Cognitive Approaches To Automated Instruction J. Wesley Regian, Valerie J. Shute, Valerie Shute, 2013-05-13 Useful to researchers as well as practitioners looking for guidance on designing automated instruction systems this book provides a snapshot of the state of the art in this research area In so doing it focuses on the two critical problems first diagnosis of the student's current level of understanding or performance and second selection of the appropriate intervention that will transition the student toward expert performance Containing a comprehensive set of principled approaches to automated instruction diagnosis and remediation it is the first volume on the topic to provide specific detailed guidance on how to develop these systems Leading researchers and practitioners represented in this book address the following questions in each chapter What is your approach to cognitive diagnosis for automated instruction What is the theoretical basis of your approach What data support the utility of the approach What is the range of applicability of your approach What knowledge engineering or task analysis methods are required to support your approach Referring to automated instruction as instruction that is delivered on any microprocessor based system the contributors to and editors of this book believe that it is possible for automated instructional systems to be more effective than they currently are Specifically they argue that by using artificial intelligence programming techniques it is possible for automated instructional systems to emulate the desirable properties of human tutors in one on one instruction

The Influence of Technology on Engineering Education John R. Bourne, 1995-08-15 This book is the outcome of a National Science Foundation study entitled Paradigm Shifts in Engineering Education The Influence of Technology SED 9253002 The overall objective of this study was to forecast which of the various possible futures in engineering education were most promising to pursue The first part of the book contains a series of critical review papers that survey the state of the art in various aspects of engineering education and attempts to look at the future to determine directions for future directions for engineering education The second part of the book contains data and summaries from meetings held by focus groups convened to discuss possible alternative forecasts From the Editor's Note

Simulation-Based Experiential Learning Douglas M. Towne, Ton de Jong, Hans Spada, 2012-12-06 In October of 1992 an assembly of researchers in simulation and computer models for instruction convened in Bonas France to learn from one another in a non automated environment The event was the Advanced Research Workshop entitled The Use of Computer Models for Explication Analysis and Experiential Learning Sponsored by the Scientific Affairs Division of NATO this workshop brought together 29 leading experts in the field loosely described as instruction and learning in simulation environments The three day workshop was organized in a manner to maximize exchange of knowledge of beliefs and of issues The participants came from six countries with experiences to share with opinions to voice and with questions to explore Starting some weeks prior to the workshop the exchange included presentation of the scientific papers discussions immediately following each presentation and informal discussions outside the scheduled meeting times Naturally the

character and content of the workshop was determined by the backgrounds and interests of the participants One objective in drawing together these particular specialists was to achieve a congress with coherent diversity i e we sought individuals who could view an emerging area from different perspectives yet had produced work of interest to many Major topic areas included theories of instruction being developed or tested use of multiple domain models to enhance understanding experiential learning environments modelling diagnostic environments tools for authoring complex models and case studies from industry
