Handbook of Test Development Thomas M. Haladyna,Steven M. Downing,2011-04-26 Despite the fact that test development is a growth industry that cuts across all levels of education and

all the professions there has never been a comprehensive research oriented Handbook to which everyone developers and consumers can turn for guidance That is the mission of this book The Handbook of Test Development brings together well known scholars and test development practitioners to present chapters on all aspects of test development Each chapter contributor is not only a recognized expert with an academic and research background in their designated topic each one has also had hands on experience in various aspects of test development This thirty two chapter volume is organized into six sections foundations content item development test design test production and administration and post test activities The Handbook provides extensive treatment of such important but unrecognized topics as contracting for testing services item banking designing tests for small testing program and writing technical reports The Handbook is based on the Standards for Educational and Psychological Testing which serve as the foundation for sound test development practice These chapters also suggest best test development practices and highlight methods to improve test validity evidence This book is appropriate for graduate courses and seminars that deal with test development and usage professional testing services and credentialing agencies state and local boards of education and academic libraries serving these groups

Systems Engineering for Business Process Change Peter Henderson,2012-12-06 A very large proportion of commercial and industrial concerns in the UK find their business competitiveness dependent on huge quantities of already installed legacy IT Often the nature of their business is such that to remain competitive they have to be able to change their business processes Sometimes the required change is radical and revolutionary but more often the required change is incremental For such incremental change a major systems engineering problem arises The cost and delay involved in changing the installed IT to meet the changed business requirements is much too high In order to address this issue the UK Engineering and Physical Science Research Council EPSRC set up in 1996 a managed research programme entitled Systems Engineering for Business Process Change SEBPC I was appointed as co ordinator of the programme The overall aim of this new managed research programme was to release the full potential of IT as an enabler of business process change and to overcome the disabling effects which the build up of legacy systems has on such change As such this aim addressed a stated objective of the Information Technology and Computer Science IT CS part of EPSRC to encourage research at a system level
