Coherent Collective Interactio:

Networks of Interacting Machines Dieter Armbruster, Kunihiko Kaneko, Alexander S. Mikhailov, 2005 This review volume is devoted to a discussion of analogies and differences of complex production systems OCo natural as in biological cells or man made as in economic systems or industrial production Taking this unified look at production is based on two observations Cells and many biological networks are complex production units that have evolved to solve production problems in a reliable and optimal way in a highly stochastic environment On the other hand industrial production is becoming increasingly complex and often hard to predict As a result modeling and control of such production networks involve many different spatial and temporal scales and decision policies for many different structures The common themes of industrial and biological production include evolution and optimization synchronization and self organization robust operation despite high stochasticity and hierarchical dynamics The mathematical techniques used come from dynamical systems theory transport equations control theory pattern formation graph theory discrete event simulations stochastic processes and others The application areas range from semiconductor production to supply chains protein networks slime molds social networks and whole economies

Near-Field-Mediated Photon-Electron Interactions

Nahid Talebi, 2019-11-16 This book focuses on the use of novel electron microscopy techniques to further our understanding of the physics behind electron light interactions It introduces and discusses the methodologies for advancing the field of electron microscopy towards a better control of electron dynamics with significantly improved temporal resolutions and explores the burgeoning field of nanooptics the physics of light matter interaction at the nanoscale whose practical applications transcend numerous fields such as energy conversion control of chemical reactions optically induced phase transitions quantum cryptography and data processing In addition to describing analytical and numerical techniques for exploring the theoretical basis of electron light interactions the book showcases a number of relevant case studies such as optical modes in gold tapers probed by electron beams and investigations of optical excitations in the topological insulator Bi₂Se₃ The experiments featured provide an impetus to develop more relevant theoretical models benchmark current approximations and even more characterization tools based on coherent electron light interactions

Distributed Artificial Intelligence: Theory and Praxis

Nicholas M. Avouris, Les Gasser, 1992-11-30 Distributed AI is the branch of AI concerned with how to coordinate behavior among a collection of semi autonomous problem solving agents how they can coordinate their knowledge goals and plans to act together to solve joint problems or to make individually or globally rational decisions in the face of uncertainty and multiple conflicting perspectives Distributed coordinated systems of problem solvers are rapidly becoming practical partners in critical human problem solving environments and DAI is a rapidly developing field of both application and research experiencing explosive growth around the world This book presents a collection of articles surveying several major recent developments in DAI The book focuses on issues that arise in building practical DAI systems in real world settings and covers

work undertaken in a number of major research and development projects in the U S and in Europe It provides a synthesis of recent thinking both theoretical and applied on major problems of DAI in the 1990s Collective Interaction Between a Bose-Einstein Condensate and a Coherent Few-photon Field Claudius Ferdinand Brennecke,2009 **Passive Microwave Remote Sensing of Land--Atmosphere Interactions** Bhaskar J. Choudhury,Yann H. Kerr,Eni G. Njoku,Paolo Pampaloni,2023-05-31 Recent advances in theory and observations using passive microwave remote sensing have highlighted the potential of spaceborne sensors for contributing to the required land surface measurements of soils vegetation snow cover and precipitation Furthermore the spatial resolution of passive microwave observations matches the special scales of large scale models of land atmosphere interactions both for data assimilation and validation In order to stimulate and focus this research a workshop sponsored by ESA and NASA was organized to review the state of the art in microwave radiometry related to land applications and to exchange ideas leading into new directions for future research This volume contains the refereed papers from the aforementioned ESA NASA workshop which are arranged by topic as well as the edited working group reports *Atomic Physics: Precise Measurements and Ultracold Matter* Massimo Inguscio,Leonardo Fallani,2013-09-19 This book illustrates the history of Atomic Physics and shows how its most recent advances allow the possibility of performing precise measurements and achieving an accurate control on the atomic state Written in an introductory style this book is addressed to advanced undergraduate and graduate students as well as to more experienced researchers who need to remain up to date with the most recent advances The book focuses on experimental investigations illustrating milestone experiments and key experimental techniques and discusses the results and the challenges of contemporary research Emphasis is put on the investigations of precision physics from the determination of fundamental constants of Nature to tests of General Relativity and Quantum Electrodynamics from the realization of ultra stable atomic clocks to the precise simulation of condensed matter theories with ultracold gases The book discusses these topics while tracing the evolution of experimental Atomic Physics from traditional laser spectroscopy to the revolution introduced by laser cooling which allows the manipulation of atoms at a billionth of a degree above absolute zero and reveals new frontiers of precision in atomic spectroscopy **Coherent and Collective Interactions of Particles and Radiation Beams** Società italiana di fisica,1996 This book is especially concerned with fundamental theoretical and experimental aspects of relativistic beam physics recoil and cooling phenomena in atomic and ion beams and traps with emphasis on coherence and collective effects The central theme is the physics of atomic laser and free electron laser and the development of a bridge between them through the mechanism of the so called recoil induced gain mechanism The links between relativistic beam physics and atomic laser physics are explored This book is targeted at an audience of non specialists or specialists in only one of the fields mentioned above It addresses the following topics Fundamentals of laser cooling and trapping of atoms theory and experiments Quantum optics and atomic coherence effects Laser cooling of trapped ions from

single ion to ion crystal Spatio temporal instabilities in optical systems Coherence in atom optics atomic diffraction and interferometry Optical lattices nonlinear effects in laser cooled atoms Coherent population trapping Two level gain and collective recoil induced effects Fundamental physics of relativistic particles beams High gain free electron laser theory experiments and projects Cooling of ion beams in a storage ring Experiments on dense laser cooled stored ion beams

Connolly,2012-12-06 Research on ferroelectricity and ferroelectric materials started in 1920 with the discovery by Valasek that the variation of spontaneous polarization in Rochelle salt with sign and magnitude of an applied electric field traced a complete and reproducible hysteresis loop Activity in the field was sporadic until 1935 when Busch and co workers announced the observation of similar behavior in potassium dihydrogen phosphate and related compounds Progress thereafter continued at a modest level with the undertaking of some theoretical as well as further experimental studies In 1944 von Hippel and co workers discovered ferroelectricity in barium titanate The technological importance of ceramic barium titanate and other perovskites led to an upsurge of interest with many new ferroelectrics being identified in the following decade By 1967 about 2000 papers on various aspects of ferroelectricity had been published The bulk of this widely dispersed literature was concerned with the experimental measurement of dielectric crystallographic thermal electromechanical elastic optical and magnetic properties A critical and excellently organized compilation based on these data appeared in 1969 with the publication of Landolt Bornstein Volume 111 3 This superb tabulation gave instant access to the results in the literature on nearly 450 pure substances and solid solutions of ferroelectric and antiferroelectric materials Continuing interest in ferroelectrics spurred by the growing importance of electrooptic crystals resulted in the publication of almost as many additional papers by the end of 1969 as had been surveyed in Landolt Bornstein **Soviet Physics** ,1979 **Proceedings of the ...
