*International conflict and cohesion in international political coalitions* Philip Terrence Hopmann,1970      **Unity and Disintegration in International Alliances: Comparative Studies** Ole R. Holsti,P. Terrence Hopmann,John D. Sullivan,1973      **International Development and Local Faith Actors** Kathryn Kraft,Olivia J. Wilkinson,2020-03-17 This book explores the interplay and dialogue between faith communities and the humanitarian development community Faith and religion are key influencers of thought and practice in many communities around the world and development practitioners would not be able to change behaviours for improved health and social relations without the understanding and influence of those with authority in communities such as religious leaders Equally religious leaders feel responsibilities to their communities but do not necessarily have the technical knowledge and resources at hand to provide the information or services needed to promote the well being of all in their scope of influence The book demonstrates that partnerships between humanitarian development practitioners and religious communities can be mutually beneficial exchanges but that there are also frequently pitfalls along the way and opportunities for lessons to be learned by each party Delving into how humanitarians and faith communities engage with one another the book focuses on building knowledge about how they interact as peers with different yet complementary roles in community development The authors draw on the Channels of Hope methodology a tool which seeks to engage faith leaders in addressing social norms and enact social change as well as other related research in the sector to demonstrate the many ways in which humanitarian and development policy makers and practitioners could achieve more systematic engagement with faith groups This book is an important contribution to the growing body of literature on faith and development and will be useful both to researchers and to practitioners working with faith communities      **Peacekeeping and the African Union** Jude Cocodia,2017-09-27 This book offers a detailed examination of the effectiveness of the peacekeeping operations of the African Union Despite its growing reputation in peacekeeping and its status as the oldest continental peacekeeper the performance of the African Union AU has hitherto not been assessed This book fills that gap and analyses six case studies Burundi Comoros Somalia Mali Darfur and the Central African Republic From a methodological perspective it takes a problem solving approach and utilises process tracing in its analysis with its standard for success resting on achieving negative peace the cessation of violence and provision of security Theoretically this study offers a comprehensive list of factors drawn from peace literature and field experience which influence the outcome of peacekeeping Beyond the major issues such as funding international collaboration and mandate this work also examines the impact of largely ignored factors such as force integrity and territory size The book modifies the claim of peace literature on what matters for success and advocates the indispensability of domestic elite cooperation local initiative and international political will It recognises the necessity of factors such as lead state and force integrity for certain peace operations In bringing these factors together this study expands the peacekeeping debate on what matters for stability

in conflict areas This book will be of much interest to students of peacekeeping African politics war and conflict studies and International Relations in general **Dissertation Abstracts International** ,2002 Rowing News ,1999-03-21

Towards an Avant-Garde Europe. Current Status and Future Perspectives Goran Ilik,2020-04-24 Anthology from the year 2017 in the subject Politics Topic European Union language English abstract The first chapter is a qualitative analysis of the Lisbon Treaty and its institutional and political implications for the international political identity of the European Union as a global actor With the integration of the EU s foreign policy capacities and the fusion of the former three pillars the Lisbon Treaty makes some sort of rationalization of the institutions in terms of providing efficient and simplified decision making suitable for implementing a coherent foreign policy This chapter concludes that the Lisbon Treaty does not represent a finalit politique of the EU integration process but just a step towards its achievement The second chapter analyses the main determinants that can affect the functioning of the European Union as one of the key global players in the contemporary world Being a unique and highly specific international actor the EU is a major power in terms of economic potential and the attractiveness of its social and cultural model but it is also a dwarf in the sphere of foreign and security policy The third chapter suggests an answer to the question of national identity and belonging to nation states in an avant garde Europe In other words it examines what might the avant garde of national identity in Europe in the XXI century be will nationalities and simple belonging to nation states be sufficient for Europeans what is the vitality and the potential of pan European identity to fill the gaps of national identity and how the two strains of belonging relate to each other The fourth chapter describes how judicial bodies through their case law shaped and modeled the federal structures of government in the cases of the United States and the European Union Through initially laying out the theoretical explanations of the significance of constitutional judicial review in federal structures and elaborating on the powers and position of the Supreme Court in the United States and the Court of Justice in the European Union the author seeks to show how these bodies influenced in similar ways some of the key features of these two federal organizations The fifth chapter argues about Europe which as a continent has throughout its history been one of the most popular destinations for migrants and foreigners who have viewed the Old continent as a place of better social and economic possibilities The migrant crisis has thus become a real litmus test for the EU coherence and unity East-West Relations: A systematic survey Daniel Frei,Dieter Ruloff,1983 External Hostility and Internal Conflict Robert Shiao Wang,1976 Civil Protection and Domestic Security in Contemporary Hybrid Warfare Wojciech Wróblewski,Michał Wiśniewski,Jędrzej Bieniasz,2025-05-22 Civil Protection and Domestic Security in Contemporary Hybrid Warfare presents a comprehensive approach to civil protection and domestic security in contemporary hybrid armed conflict Hybrid warfare encompasses a number of dimensions such as military political psychological cognitive space social economic informational or technological Current conflicts show that hybrid warfare despite regional differences is based on a common operational framework that combines conventional and unconventional tactics targeting not only military structures

but also largely targeting civilians societies All this makes threats more diffuse subtle and difficult to predict They also often take the form of networked actions and have cascading effects in which they can produce complex secondary effects affecting a range of spheres of society and key infrastructure In response to this spectrum of threats individual states need to adapt their security and civil protection systems to the type of threat involved However most existing solutions are fragmented resulting in a reduced ability to coordinate and adequately prepare civilians for hybrid threat conditions Given these challenges the book establishes a common language that helps shape coherent risk management and protective mechanisms in dealing with hybrid attacks It also points in a new direction in ensuring the reliability of information provided to civilians which is crucial in a hybrid war environment where disinformation is used as one of the main tools of destabilisation Drawing on theoretical knowledge and practical experiences from around the world the book provides tools to effectively respond to existing and future conflicts and hybrid wars Above and beyond this bridging the gap between concrete knowledge of hybrid warfare and operational needs this book explores how public administrations public services NGOs local communities and other actors play a key role in protecting the population during such non traditional armed conflicts Civil Protection and Domestic Security in Contemporary Hybrid Warfare is a vital resource to government and civilian specialists responsible for population security and protection helping them and their civilian populations to strategise and oftentimes to individually mitigate the risk of loss of life or health as has been demonstrated in the Russia Ukraine conflict
