Cold War Statesmen Confront The Bomb Nuclear Diplomacy Since 1945:

Cold War Statesmen Confront the Bomb John Lewis Gaddis, 1999 *Cold War Statesmen Confront the Bomb Nuclear Diplomacy Since 1945* is a path breaking work that uses biographical techniques to test one of the most important and widely debated questions in international politics Did the advent of the nuclear bomb prevent the Third World War Many scholars and much conventional wisdom assumes that nuclear deterrence has prevented major power war since the end of the Second World War this remains a principal tenet of US strategic policy today Others challenge this assumption and argue that major war would have been obsolete even without the bomb This book tests these propositions by examining the careers of ten leading Cold War statesmen Harry S Truman John Foster Dulles Dwight D Eisenhower John F Kennedy Josef Stalin Nikita Krushchev Mao Zedong Winston Churchill Charles De Gaulle and Konrad Adenauer and asking whether they viewed war and its acceptability differently after the advent of the bomb The book s authors argue almost unanimously that nuclear weapons did have a significant effect on the thinking of these leading statesmen of the nuclear age but a dissenting epilogue from John Mueller challenges this thesis

The Challenge of Nuclear-armed Regional Adversaries David A. Ochmanek, Lowell Schwartz, 2008 A defining feature of the post Cold War international security environment has been that the United States acting either alone or with allies and coalition partners possessed the capability to impose its will on states such as Serbia and Iraq under Saddam Hussein that could be termed regional adversaries We define this term to mean countries 1 that pursue policies that are at odds with the interests of the United States and its security partners and that run counter to broadly accepted norms of state behavior and 2 whose size and military forces are not of the first magnitude 1 The category is useful as a means of distinguishing this group of states from larger more powerful states such as Russia China and India which do not share their vulnerabilities to forcible intervention and which for the present at least are pursuing policies vis vis the United States and its allies that are generally more cooperative than confrontational

The Waning of Major War Raimo Vayrynen, 2013-10-31 This book is a systematic effort by leading international scholars to map the trends in major power warfare and explore whether it is waxing or waning The main point of departure is that major power war as a historical institution is in decline This does not mean though that wars between states are in general disappearing While there is some convergence in the conclusions by individual authors they are by no means unanimous about the trend The articles explore different causes and correlates of the declining trend in major power warfare including the impact of the international structure nuclear weapons international law multilateral institutions sovereignty and value changes
