Alexander Stefan,2002-11-11 EINSTEIN S REVOLUTIONARY WISDOM Seven Last Days in the Life of Albert Einstein A Novel *Deleuze, Japanese Cinema, and the Atom Bomb* David Deamer,2014-07-31 David Deamer establishes the first ever sustained encounter between Gilles Deleuze s Cinema books and post war Japanese cinema exploring how Japanese films responded to the atomic bombings of Hiroshima and Nagasaki From the early days of occupation political censorship to the social and cultural freedoms of the 1960s and beyond the book examines how images of the nuclear event appear in post war Japanese cinema Each chapter begins by focusing upon one or more of three key Deleuzian themes image history and thought before going on to look at a selection of films from 1945 to the present day These include movies by well known directors Kurosawa Akira Shindo Kaneto Oshima Nagisa and Imamura Shohei popular and cult classics Godzilla 1954 Akira 1988 and Tetsuo 1989 contemporary genre flicks Ring 1998 Dead or Alive 1999 and Casshern 2004 the avant garde and rarely seen documentaries The author provides a series of tables to clarify the conceptual components deployed within the text establishing a unique addition to Deleuze and cinema studies **Essential Readings in Biosemiotics** Donald Favareau,2010-06-10 Synthesizing the findings from a wide range of disciplines from biology and anthropology to philosophy and linguistics the emerging field of Biosemiotics explores the highly complex phenomenon of sign processing in living systems Seeking to advance a naturalistic understanding of the evolution and development of sign dependent life processes contemporary biosemiotic theory offers important new conceptual tools for the scientific understanding of mind and meaning for the development of artificial intelligence and for the ongoing research into the rich diversity of non verbal human animal and biological communication processes Donald Favareau s Essential Readings in Biosemiotics has been designed as a single source overview of the major works informing this new interdiscipline and provides scholarly historical and analytical commentary on each of the texts presented The first of its kind this book constitutes a valuable resource to both bioscientists and to semioticians interested in this emerging new discipline and can function as a primary textbook for students in biosemiotics as well Moreover because of its inherently interdisciplinary nature and its focus on the big questions of cognition meaning and evolutionary biology this volume should be of interest to anyone working in the fields of cognitive science theoretical biology philosophy of mind evolutionary psychology communication studies or the history and philosophy of science *Collected papers* Charles Rochester Eastman,1899 **Albert Einstein: The Son-in-law of the Serbs (the Yugoslavs)** V. expressly pictorial type of visual archaeology the transcribing of three dimensional materiality into two dimensional depictions and its influential history within the discipline The picturing of ancient sites and artifacts to convey information links visual reporting with the workings of the imagination and indicates that the study of antiquity has always had a hybrid identity part artistic and part scientific In examining expressly pictorial forms of visual story telling about the past this book looks beyond certain supposed creative turns and focuses instead on creative continuities answering key questions about the power of picturing and its ability to not only inform documentary practices but actively structure those practices How are prints drawings paintings and photographs able to collapse the three dimensional world of the ancient past onto a flat page but also convey a sense of material reality In contemporary practice how do pictorial ways of seeing enable the interpretation of material remains but also shape the recognition of digital traces on a computer screen Published illustrations both historical and contemporary are primary sources of evidence for answering such questions and identifying common patterns of pictorial information This book provides a framework for scholars researching the visual culture of archaeology as well as the history of archaeology It is also recommended for professionals in the fields of heritage studies conservation and community archaeology Collected Papers University College, London.
