entwined with a chain of frustrations The because that s how it is attitude forced me to abandon all logic and surrender to repetition and memorization or face a corresponding punishment How can something as beautiful as music be pure suffering What we now call Western music has become over three millennia a gigantic accumulation of intellectual filth spiced with religious necromancy Superstitions about the number seven panic at the thought of invoking Satan or taking refuge from the evil one in the cult of Saint John the Baptist All of this is too Catholic Too alien to music And the most incomprehensible thing is that civilizations completely foreign to Christianity continue to allow themselves to be colonized by these grotesque superstitions without anyone stopping to put some order in so much confusion because musicians never ask questions they repeat and obey Yet today we know that sound is produced in auditory consciousness We know its brain mechanisms We know how we feel it We know that harmony is based on sets of relative dissonances And that their relationships can be expressed in truth tables just like numerical systems on the basis of simple mathematical relationships For what is not simple is noise And if there is one thing a healthy brain hates more than noise it is the practical applications of irrational theories that detest logic and condemn trial and error Tired of spending more than forty years trying to understand the incomprehensible the time has come to develop this Theory of Chromatic Harmony so that playing any instrument composing or simply listening is as simple as playing with colors
