Mooneyes and the Dark Moon Council I. L. Davis,2013-03-08 It was said that the eyes of moon elves glowed with the light of their gods both during the day and the night This was a blessing for the moon elves However Karuks eyes did not glow for they were as black as night and the elders had believed his heart would be just as dark He was born bigger and stronger and with light colored hair The elders debated whether or not to take this young elf to the woods and leave him to die This way the darkness within him would die with him However fate had its own plans and the elves decided to raise the child within the camp in hopes that the darkness would fade from him and the blessing of the elves would fall on him before he became a man That same night Jimni and Dawgknight were born Jimnis cub was a gray saber toothed wolf with eyes that glowed green He named the cub Emerald Dawgknights cub was a saber toothed tiger with fur as black as the darkest night and eyes that glowed light blue He named his cub Soul After they and their pets where trained they began their brotherly competitions with each other They competed so much that they even had a bet that the loser would have to name his firstborn son after the one who was knighted first

Moons of the Solar System John Stewart,1991 The first

half of this book is devoted to earth's moon Luna. General statistical data are followed by an alphabetical listing of such subjects as eclipses, lunar spacecraft landings, phenomena, mapping, and the hundreds of small and large surface features with the sources of their names. The second half is about the 66 other known moons of the solar system arranged alphabetically according to their accepted names as of February 1991. Each description includes the size of the moon, date of discovery, and other statistical information. The photographs are supplied by the U.S. Geological Survey, Department of the Interior, the National Aeronautics and Space Administration, and the Jet Propulsion Laboratory.

The Story of the Solar System: A Visual Journey Maggie Aderin-Pocock, 2024-09-26

The nation's go-to woman for all things space. Her joy for the subject is boundless. The Guardian. Take a new look at the world around you. What is a planet? Is there life on Mars? What makes Earth so special? Questions about our Solar System have fascinated us for centuries. Based on the latest scientific research, *The Story of the Solar System* will help you see the planets around us in a whole new light. Using colourful and easy-to-follow infographics, each planet becomes a character with a story of its own to tell, from Jupiter the King of the Solar System to ice oddity Uranus and outlier planet but not a planet Pluto. As space scientist Maggie Aderin-Pocock shows us, the story of Earth is best understood as part of its larger family, and *The Story of the Solar System* will bring that family to life.

Moons & Planets William K. Hartmann, 1993

Written by a well-known author, scientist, and painter, *Moon and Planets* remains a unique classic in the field through its organization by physical subjects such as planetary surfaces, planetary interiors, atmosphere, etc. Only this approach allows true comparative planetology, i.e. presentation of general physical principles such as volcanism, tectonic evolution, mantle convection, cratering processes, and atmosphere temperature structure, followed by applications to various individual planets, satellites, and interplanetary bodies.
