Creating A Thinking Organization Ground Rules For Success:

Creating a Thinking Organization Rikki Hunt,1999 **Creating a Thinking Organization** Rikki Hunt,Tony Buzan,1999
Entrepreneur Rikki Hunt joins forces with Mind expert Tony Buzan to provide a blueprint for individual and corporate transformation They demonstrate how to unlock potential turbocharge management and leadership practices and motivate diverse groups of people *Choosing the Future* Stuart Wells,2012-06-25 Strategy requires an ability to conceive the future see and create possibilities and focus to choose a direction Successful strategy is a mental discipline consisting of broad ranging flexible and creative thinking Choosing the Future will help you achieve this success by studying fundamentals such as effective group thinking knowing when to delay a decision for more information balancing contrasting modes of thought and transforming thought into action Using a cycle to show the relationship among different strategic thinking tools Choosing the Future gives you guidance to respond to these basic questions What seems to be happening What possibilities do we face What are we going to do about it Choosing the Future will help you advance your thinking skills Rather than telling you what to do it teaches you to use your business knowledge to discover your own ideas and strategic direction Stuart Wells is Professor of Organization and Management at San Jose State University where he serves as Director of the Center for Global Competitiveness and as Director of the Small Business Institute As founder of the Leading Edge Consulting Group and co founder of Corporate Wisdom he has worked on leadership development and strategy issues with such major corporations as Clorox Dupont PepsiCo and Proctor and Gamble He is the author of several books including From Sage to Artisan The Nine Roles of the Value Driven Leader *Practical Wisdom for Building Your Vision* Jonathan Carey,2008
Practical Wisdom for Building Your Vision by Jonathan Carey presents practical and biblical principles for discovering and developing a God given vision Consider these exciting and timely topics A Clear and Challenging Vision Why a Vision is often future focused Life Prayer Counsel and Faith Organizational Structures Shifts and Challenges With Scripture and personal experience this informative step by step guide to creating and developing a God given vision will influence and inspire all who are seeking to lead others to the Lord Practical Wisdom for Building Your Vision also includes the 5RCircle Process in a workbook format for the development of your vision This book is a must for leaders and leadership teams Make an Ethical Difference Mark Pastin,2013-11-04 We are plagued today by a decline in ethical behavior Scandals come so thick and fast that any attempt to list them is out of date in weeks if not days But ethics isn t just a matter of headlines it s a part of everyone s life We re called on to make ethical decisions large and small all the time This can be particularly tricky in the workplace where our decisions can affect not just ourselves but coworkers clients customers and even the entire company Existing ethics books are of limited use They generally feature one author s opinions on very specific situations which may well have nothing to do with the problems we re facing And anyway we don t need expert advice Mark Pastin insists every one of us is qualified to resolve even the thorniest dilemmas ourselves and in this profoundly practical book he gives us the

tools to do just that Pastin argues that we all have an innate ethical he calls it the ethics eye The problem is we re not aware we have it or how to develop it Here he provides practical tools we can use to open up our ethics eye so that we can consistently see what is right and do it Make an Ethical Difference shows how to apply these tools using actual ethical dilemmas drawn from Pastin s decades of experience as an advisor to governments corporations and NGOs The point is not to try to wedge your situation into one of the examples it s to show how a tool that can be applied to any situation is used in one particular instance And once you ve reached a decision Pastin offers strategies for building consensus with those who might disagree with you People often feel hopeless and skeptical that there is anything they as individuals can do to raise society s ethical level or resolve long standing impasses By using the unique tools in this book we will gain confidence in our innate ethical sense and take actions that will elevate the ethical level of the groups and organizations we belong to and society as a whole

Strategic Decision Making for Successful Planning CJ Rhoads,William Roth,2021-12-30

Turbulence is not new to the business world In fact turbulence is increasing and managers are seeing teams spinning their wheels Management systems are in a state of crisis and operations are more complex The old top down operations mode no longer suffices Today s businesses demand speed and increased accuracy forcing everyone to re evaluate chains of command and tear down the walls between functions Amid the responsibilities of traditional management lies problem solving The push is toward moving decision making authority down the ladder to all levels Managers are no longer equipped to or capable of making the number and variety of necessary decisions in a vacuum The current mode is to have employees deal directly with workplace issues and take corrective action without complaint and without management involvement Coping with this reality and preparation for these improvements in workplace problem solving requires interest and motivation Strategic Decision Making for Successful Planning can facilitate this by demystifying and simplifying the process The book bridges philosophy and theory and puts together a practical integration of all the tools necessary to get results from your investment of time energy and money What is unique about this book is while it s based on a strong academic foundation it does not get bogged down in the human planning or psychological process of solving problems It doesn t provide pie in the sky creative solutions or a five year process for solving problems and planning for the future Numerous techniques and tools are included to make the book the right balance between practical and academic The book also includes an extensive case study to illustrate points made in the text

of Korea Singapore and more recently countries in Central Asia like Kazakhstan now have major think tanks These institutions have become the go to organizations for proposals and policy advice on key economic security social and environmental issues This book by a noted expert in the field traces the growing influence of these policy actors in Asia places the trend in historical context and explores how the region s countries have fostered the growth of think tanks with uniquely Asian characteristics
