Creating The Computer Government Industry And High Technology:

Creating the Computer Kenneth Flamm, 2010-12-01 The development of the first electronic digital computers in the 1940s signaled the beginning of a new and distinctive type of industry an industry marked by competition through innovation and by the large percentage of revenues spent on research and development Written as a companion volume to Targeting the Computer Government Support and International Competition this comprehensive volume provides a new understanding to the complex forces that have shaped the computer industry during the past four decades Kenneth Flamm identifies the origins of technologies important to the creation of computers and traces the roots of individual technologies to the specific research groups and programs responsible for major advances He evaluates the impact of these innovations on industrial competition and argues that the emergence of specialization and product differentiation in the 1950s and the compatibility and standards in the mid 1960s were key factors defining this competition Flamm also identifies the various market strategies adopted in later decades to challenge an industry leader strategies linked to the entry and exit of individual firms In addition to the effects of technology and internal industry developments international competition and national policies on technology trade and investment shaped the evolution of this new industry Flamm documents the role of government support for technology in the United States Western Europe and Japan and describes the critical technological and economic links between national and international markets Finally he links these strategies technological trends and national policies to one another and shows how they continue to influence current developments in the computer industry

The Computer in the United States James W. Cortada, 1993-09-03 This book studies how a technological innovation in this case the computer progresses from its origin as an idea in someone s mind to its eventual manifestation as a useable and marketable consumer product

Sources of Industrial Leadership David C. Mowery, Richard R. Nelson, 1999-10-13 This book describes and analyzes how seven major high tech industries evolved in the United States Japan and Western Europe The industries covered are machine tools organic chemical products pharmaceuticals medical devices computers semiconductors and software In each of these industries firms located in one or a very few countries became the clear technological and commercial leaders In a number of cases the locus of leadership changed sometimes more than once over the course of the histories studied The focus of the book is on the key factors that supported the emergence of national leadership in each industry and the reasons behind the shifts when they occurred Special attention is given to the national policies that helped to create or sustain industrial leadership

Cortada,2002 In Making the Information Society James Cortada offers a profound new perspective on the meaning of the information age in today's society He steps back from the hurly burly of the Internet current technological advance and stock market churn viewing the broad sweep of change related to information technology and the unparalleled impact of information on our lives This book takes on the big questions How did the information revolution happen What are its roots And what does it mean to our lives as citizens family members and businesspeople Cortada demonstrates how the values and behavior of the information age are firmly rooted in hundreds of years of Western culture showing why the information revolution took root in America first and why Americans have been uniquely receptive to its promises He then shows American creativity at work leveraging information technology in every slice of life from work to play to religion Finally he offers an informed thoughtful preview of what's likely to happen next as the information age continues to evolve at breakneck speed This book is a companion to the successful *A Nation Transformed by Information How Information has Shaped the United States from Colonial Times to Present* by James Cortada and Pulitzer Prize winner Alfred Chandler Automation in Local Government Elaine Gray,1990 **Harvard Business School Core Collection 1995** Baker Library,1995 The Political Economy of Industrial Policy in Europe and the Member States Damien J. Neven,2000 Santa Clara Computer and High-technology Law Journal ,1993 The IEBM Handbook of Economics William Lazonick,2002 With contributions from leading international academics this handbook covers systems of economic organization systems of economic thought business enterprise industrial organization economic institutions and notable economists Business and Economic History Business History Conference,1995 Globalisation of Industry Organisation for Economic Co-operation and Development,1996 **Dynamics of Technological Change** Louis A. Girifalco,1991-05-31 Technology is not an end in itself but a way of satisfying human wants It shows us how to solve the age old economic problem of surviving and prospering in a hard world But to optimize the benefits of technological advance requires an understanding of how it happens The purpose of this book is to provide some of that understanding The subject is so enormous and so intertwined with every human activity that a small selection of it and that from a special viewpoint is inevitable The selection of subject matter has been of course conditioned by what interests me and is somewhat heterogeneous However it is connected by two major themes The first is that it emphasizes the dynamic

nature of technology in the sense that it must be approached as a process evolving in time that can often be described in quantitative terms The second is that I have chosen topics that I believe are essential for a strategic sense of how to plan for execute and respond to technological change These two themes complement each other because the strategic sense requires an appreciation of the dynamics and the dynamics naturally lead to a consideration of how to deal with technology so that it can be used to achieve human objectives The unifying thought behind the book is that technological change has a systemic as well as an idiosyncratic aspect
