Creation Of Human Ability:

The Creation of Human Ability La Fayette Ron Hubbard,2007 From the Book Jacket From the three feet behind your head to a Grand Tour of the Universe revealed within are the mysteries of exteriorization and the step by step route to native state ability as a thetan exterior Having already mapped the unlimited potentials of a thetan in Scientology 8 8008 here is the culmination of Ron s next year of intensive research and development working with auditor after auditor preclear after preclear and delivering no less than 500 lectures to make those potentials a reality What resulted were no less than the Axioms of Scientology and auditing processes drawn from the very fabric of those revelations Here then is the panoramic view of Scientology complete the Auditor s Code Code of Honor and Code of a Scientologist a summary of Scientology and the Axioms Intensive Procedure and the famed processes of Route 1 and Route 2 processes that literally make and break communication with the physical universe to undo Man s inverted belief that mechanics are superior to one s own considerations and finally the means to fully rehabilitate a being s innate abilities as a thetan exterior And that s why no book has ever been more aptly named For this is **The Creation of Human Ability** LaFayette Ron Hubbard,1965 *Creation of Human Ability* ,1940 [Conceptualising Concepts in Greek Philosophy](#) Gábor Betegh,Voula Tsouna,2024-05-02 A collection of seminal philosophical studies on the ancient Greek views regarding the nature formation and conceptualisation of concept *The Champion of the faith against current infidelity, ed. by J. colonial and post independence eras Human rights are rights inherent to all human beings whatever our nationality place of residence sex national or ethnic origin color religion language or any other status We are all equally entitled to our human rights without discrimination These rights are all interrelated interdependent and indivisible Universal human rights are often expressed and guaranteed by law in the forms of treaties customary international law general principles and other sources of international law International human rights law lays down obligations of Governments to act in certain ways or to refrain from certain acts in order to promote and protect human rights and fundamental freedoms of individuals or groups Human rights are inalienable They should not be taken away except in specific situations and according to due process For example the right to liberty may be restricted if a person is found guilty of a crime by a court of law Interdependent and indivisible All human rights are indivisible whether they are civil and political rights such as the right to life equality before the law and freedom of expression economic social and cultural rights such as the rights to work social security and education or collective rights such as the rights to development and self determination are indivisible interrelated and interdependent The improvement of one right facilitates advancement of the others Likewise the deprivation of one right adversely affects the others Equal and non discriminatory Non discrimination is a crosscutting principle in international human rights law The principle is present in all the major human rights treaties and provides the central theme of some of international human rights conventions such as the International Convention on the Elimination of All Forms of Racial Discrimination and the Convention on the Elimination of All Forms of Discrimination against Women Human Rights as parts of moral discourse have significant implication on content of political social and economic life of human beings
