Reforming Teaching and Teacher Education Eija Kimonen,Raimo Nevalainen,2017-03-21 What are the prerequisites for reforming education and how can these reforms be seen in school development and culture How should teacher education support this reform process What are the principles and practices underlying the functioning of the schools of tomorrow

These questions are examined in this unique volume. The authors in this book argue that the central function of teacher education and education in general is to respond to the challenges brought on by the twenty first century. According to this approach, the competencies and skills needed in the future are not merely a new addition to school activities but rather something requiring a comprehensive reform of school culture encompassing teacher education, curricula, and teaching methods. Such a fundamental process of change in the action and thinking models used by schools would be an effort to achieve a complete transformation, the result of which would be schools developing into organizations that are both creative and imbued with a strong sense of community. A central attribute is that the creation of new knowledge is not just restricted to the classroom but also takes place in out of school environments. This would link learning to its natural context, eventually leading to an ideal instruction that is actively problem oriented, holistic, and life centered. This reform minded volume is divided into three parts. The first part focuses on the reform processes in teacher education, the second on the reforms of pedagogics at schools and teacher education institutions, and the third on the processes of reculturing schools. New prospects for active schools in the United States and Europe as well as in Japan and China are discussed.

A Cultural Economic Analysis of Craft Anna Mignosa, Priyatej Kotipalli, 2019-06-11

Are we aware of the values of craft? In this edited volume, cultural economists, researchers, and professionals provide an interdisciplinary discussion of the relevance and contribution of the craft sector to the economy as well as to society at large. Mignosa and Kotipalli bring together contributors to compare the craft sector across countries, analysing the role of institutions, educational bodies, organisations, and market structure in its evolution and perception. The Western approach to craft and its subordinate position to the arts is contrasted with the prestige of craftsmanship in Eastern countries, while the differing ways that craft has attracted the attention of policy agencies, museums, designers, and private institutions across regions is also analysed. This volume is vital reading to those interested in the economic features of craft and craftsmanship around the world, as well as for those interested in the importance of policy in bringing about effective sustainable development.

Roycraft: Western New York Craft and its Inclusion in Contemporary Crafts Curriculum Megan Westenfield, 2012-05-09

This book is a research study on how craft in Western New York is incorporated into craft curriculum. It highlights the history of craft as well as the vast history and culture of craft found right in the Western New York Region. Research was conducted through a literature review, curriculum review, and interviews. This study was done as a small scale study, so the results may not be generalizable across the field of education. Research of this kind helps to promote craft as well as bring new questions to light for new research studies.
