**Code Cicada** Warren Reed, 2004      **The Community and the Algorithm: A Digital Interactive Poetics** Andrew Klobucar, 2021-09-07

Digital media presents an array of interesting challenges adapting new modes of collaborative online communication to traditional writing and literary practices at the practical and theoretical levels For centuries popular concepts of the modern author regardless of genre have emphasized writing as a solo exercise in human communication while the act of reading remains associated with solitude and individual privacy The Community and the Algorithm A Digital Interactive Poetics explores important cultural changes in these relationships thanks to the rapid development of digital internet technologies allowing near instantaneous synchronous multimedia interaction across the globe The radical shift in how we author and consume media as an online electronic transmission effectively resituates the writing process across the liberal arts as less a solitary act of individual enquiry and reflection and more an ongoing collaborative process of creative interaction within a multimedia environment or network Contributions in this anthology demonstrate a robust history and equally diverse contemporary approach to multimedia interaction for literary and artistic ends Central to all media formats computation is explored throughout this volume to critically examine how algorithmic procedures in writing help bring forward many key concepts to building creative communities in a digital environment Each chapter in this book accordingly introduces readers to various new collaborative experiments using a broad range of different digital media formats including VR Natural Language Generation NLG and metagaming tools This book will appeal broadly to students instructors and independent artists working in the digital arts while its emphasis on social interactivity will interest theorists and teachers working in theatre social media and cyberpsychology Its secondary focus on computation and media programming as a site of artistic experimentation will also interest programmers and web designers at various professional levels
