Codes and Association Schemes Alexander Barg, 2001 This volume presents papers related to the DIMACS workshop Codes and Association Schemes The articles are devoted to the following topics applications of association schemes and of the polynomial method to properties of codes structural results for codes structural results for association schemes and properties of orthogonal polynomials and their applications in combinatorics Papers on coding theory are related to classical topics such as perfect codes bounds on codes codes and combinatorial arrays weight enumerators and spherical designs Papers on orthogonal polynomials provide new results on zeros and asymptotic properties of standard families of polynomials encountered in coding theory The theme of association schemes is represented by new classification results and new classes of schemes related to posets This volume collects up to date applications of the theory of association schemes to coding and presents new properties of both polynomial and general association schemes It offers a solid representation of results in problems in areas of current interest Selected Topics in Information and Coding Theory Isaac Woungang, Sudip

Misra, Subhas Chandra Misra, 2010 The last few years have witnessed rapid advancements in information and coding theory research and applications This book provides a comprehensive guide to selected topics both ongoing and emerging in information and coding theory Consisting of contributions from well known and high profile researchers in their respective specialties topics that are covered include source coding channel capacity linear complexity code construction existence and analysis bounds on codes and designs space time coding LDPC codes and codes and cryptography All of the chapters are integrated in a manner that renders the book as a supplementary reference volume or textbook for use in both undergraduate and graduate courses on information and coding theory As such it will be a valuable text for students at both undergraduate and graduate levels as well as instructors researchers engineers and practitioners in these fields Supporting Powerpoint Slides are available upon request for all instructors who adopt this book as a course text **Algebraic**

**Combinatorics** Eiichi Bannai, Etsuko Bannai, Tatsuro Ito, Rie Tanaka, 2021-02-22 Algebraic combinatorics is the study of combinatorial objects as an extension of the study of finite permutation groups or in other words group theory without groups In the spirit of Delsarte's theory this book studies combinatorial objects such as graphs codes designs etc in the general framework of association schemes providing a comprehensive overview of the theory as well as pointing out to extensions **3rd International Castle Meeting on Coding Theory and Applications** Joaquim Borges, Mercè

Villanueva, 2011-09-05 In 1999 a conference called International Meeting on Coding Theory and Cryptography took place at Mota Castle in Castilia Spain The conference had great acceptance within the community of coding theory and cryptography researchers At that moment and also nowadays there are not many international workshops about these topics at least if we compare with other mathematical and engineering subjects of research Therefore the general desire was to continue with more Castle Meetings However the following conference did not take place until 2008 In that case the conference was called

II International Castle Meeting on Coding Theory and Applications allowing more topics related to coding theory apart from cryptography Such conference took place at Mota Castle again and the number of participants was similar to the previous edition The present edition of the conference called III International Castle Meeting on Coding Theory and Applications has been held at Cardona Castle in Catalonia Spain The number of communications has increased and a number of selected papers will be published in a special issue of the journal Designs Codes and Cryptography As in the previous editions the conference has been of high level with notorious invited speakers and scientific committee members
