Coercive Cooperation Explaining Multilat:

Coercive Cooperation Lisa L. Martin, 2021-03-09 This innovative study shows that multilateral sanctions are coercive in their pressure on their target and in their origin the sanctions themselves frequently result from coercive policies with one state attempting to coerce others through persuasion threats and promises To analyze this process Lisa Martin uses a novel methodology combining game theoretic models statistical analysis and case studies She emphasizes that credible commitments gain international cooperation and concludes that the involvement of international institutions and the willingness of the main sender to bear heavy costs are the central factors influencing the sanction s credibility Coercive Cooperation Lisa Lynn Martin, 1989 Multilateral Sanctions Revisited Andrea Charron, Clara Portela, 2022-09-15 Sanctions are back with a vengeance with new objectives measures challenges and opportunities Shaping the thinking of generations of scholars Canadian visionary Margaret Doxey anticipated and analyzed these issues making now the time to rediscover her seminal lessons and apply them to emerging sanctions practices that are taking shape in an increasingly geopolitically contested environment Written by an international team of women Multilateral Sanctions Revisited explores UN measures regional sanctions autonomous measures and their interrelations Informed by Doxey s insights the authors trace the evolution of scholarship surrounding multilateral sanctions The first section analyzes how different actors such as great powers and regional organizations employ multilateral sanctions Turning to contemporary issues the book s second section addresses the application and consequences of multilateral sanctions including the norms they enforce the pernicious problem of evasion and future challenges such as sanctioning cryptocurrencies Multilateral Sanctions Revisited is both a source for academics and a guidebook for practitioners written by leading and emerging sanctions scholars from three continents Promoting Peace with Information Daniel Lindley, 2021-02-09 It is normally assumed that international security regimes such as the United Nations can reduce the risk of war by increasing transparency among adversarial nations The more adversaries understand each other s intentions and capabilities the thinking goes the less likely they are to be led to war by miscalculations and unwarranted fears But how is transparency provided how does it actually work and how effective is it in preserving or restoring peace In Promoting Peace with Information Dan Lindley provides the first scholarly answer to these important questions Lindley rigorously examines a wide range of cases including U N peacekeeping operations in Cyprus the Golan Heights Namibia and Cambodia arms control agreements including the Nuclear Non Proliferation Treaty and the historical example of the Concert of Europe which sought to keep the peace following the defeat of Napoleon in 1815 Making nuanced arguments based on extensive use of primary sources interviews and field research Lindley shows when transparency succeeds in promoting peace and when it fails His analysis reveals for example that it is surprisingly hard for U N buffer zone monitors to increase transparency yet U N nation building missions have creatively used transparency to refute harmful rumors and foster democracy For scholars Promoting Peace with Information is a major

advance into the relatively uncharted intersection of institutionalism and security studies For policymakers its findings will lead to wiser peacekeeping public diplomacy and nation building Networked Nonproliferation Michal Onderco,2021-10-05 The Treaty on Non Proliferation of Nuclear Weapons NPT had many opponents when in 1995 it came up for extension The majority of parties opposed extension and experts expected a limited extension as countries sought alternative means to manage nuclear weapons But against all predictions the treaty was extended indefinitely and without a vote Networked Nonproliferation offers a social network theory explanation of how the NPT was extended giving new insight into why international treaties succeed or fail The United States was the NPT s main proponent but even a global superpower cannot get its way through coercion or persuasion alone Michal Onderco draws on unique in depth interviews and newly declassified documents to analyze the networked power at play Onderco not only gives the richest account yet of the conference looking at key actors like South Africa Egypt and the EU but also challenges us to reconsider how we think about American power in international relations With Networked Nonproliferation Onderco provides new insight into multilateral diplomacy in general and nuclear nonproliferation in particular with consequences for understanding a changing global system as the US the chief advocate of nonproliferation and a central node in the diplomatic networks around it declines in material power *Promoting Peace with Information* Dan Lindley,2007-05-13 It is normally assumed that international security can reduce the risk of war by increasing transparency among adversarial nations But how is transparency provided how does it actually work and how effective is it in preserving or restoring peace This text provides answer to these questions Publisher s description **Non-Proliferation Export Controls** Daniel Joyner,2017-03-02 This volume provides a comprehensive and interdisciplinary examination of the Multilateral Non Proliferation Export Control system and the national and international context within which it functions Key features **Extorting Cooperation** James Gregory Strohmaier,2003 **Theories of War and Peace** Michael E. Brown,Owen R. Cote, Jr.,Sean M. Lynn-Jones,Steven E. Miller,1998-09-15 New approaches to understanding war and peace in the changing international system What causes war How can wars be prevented Scholars and policymakers have sought the answers to these questions for centuries Although wars continue to occur recent scholarship has made progress toward developing more sophisticated and perhaps more useful theories on the causes and prevention of war This volume includes essays by leading scholars on contemporary approaches to understanding war and peace The essays include expositions analyses and critiques of some of the more prominent and enduring explanations of war Several authors discuss realist theories of war which focus on the distribution of power and the potential for offensive war Others examine the prominent hypothesis that the spread of democracy will usher in an era of peace In light of the apparent increase in nationalism and ethnic conflict several authors present hypotheses on how nationalism causes war and how such wars can be controlled Contributors also engage in a vigorous debate on whether international institutions can promote peace In a section on war and peace in the changing international system several authors consider

whether rising levels of international economic independence and environmental scarcity will influence the likelihood of war

Making and Breaking Impasses in International Regimes John S. Odell, 2003 **International Cooperation on Export Controls** Michael Leslie Lipson, 1999 This dissertation provides an explanation for recent standardization and growth of international export control regimes I argue that neoinstitutionalist organization theory contributes to an explanation of these organizations which coordinate efforts to limit the spread of weapons related technologies The neoinstitutionalist approach claims that organizational structures are often not selected for maximal effectiveness at tasks such as controlling weapons related exports Rather they are selected for their fit with norms shared within communities of organizations that interact regularly or share common tasks The dissertation adapts and applies this literature to the subject of export control cooperation through process tracing case studies of export control regimes such as CoCom and the Wassenaar Arrangement I argue that a transnational community of organizations or organizational field has developed in the issue area of nonproliferation export controls While extant theories of International Relations help explain the origins of international export control cooperation they do not explain the extent or form such efforts have taken today Shared norms in this issue area and copying of organizations perceived as successful explain the growth and standardization of multilateral nonproliferation regimes and international export control practices These factors are highlighted by the sociological theories I draw upon The case studies are constructed from archival data interviews with policy makers trade literature and secondary sources *The False Promise of International Institutions* John J. Mearsheimer, 1994 **Taiwan's Policy Toward the United States and China for Its Future Since 1979** Hseik-wen Soong, 1995 **Surrendering Sovereignty** Kathleen J. Timmons Roberts, Bradley Parks, 2007 An examination of the role that inequality plays in shaping post Kyoto prospects for a North South global climate pact with statistical and theoretical analysis and case studies of recent climate related disasters **International Relations and Scientific Progress** Patrick James, 2002 International Relations and Scientific Progress argues that a theory focusing on the structure of the international system may explain a wider and more interesting range of events in world politics than other alternatives The first part of the book assesses the meaning of

progress in the discipline of international relations a process that culminates in the creation of a new concept the scientific research enterprise The second part review structural realism within that context and makes the case for an elaboration of structural realism by showing that a system level theory based on structure could have great unrealized explanatory potential The third part explores new directions most notably as related to empirical testing of an elaborated version of structural realism that focuses on both continuity and change in the international system Patrick James is professor of political science at the University of Missouri Principles Of International Politics: People's Power, Preferences, and Perceptions, 3rd Edition Bruce Bueno De Mesquita, 2006 Leaders want to stay in power Their self interest is the decisive motivation for action in the international arena and forms the theoretical backbone for this exciting departure from other introductory international relations texts Through its discussion and development of the strategic perspective Principles of International Politics shows students how leaders translate their personal interests and ambitions into actions of the state and convincingly demonstrates how international and domestic politics are inextricably linked Clearly explaining both the foundational ideas of international relations as well as the key concepts of the strategic perspective Bueno de Mesquita effectively links these to the analytic tools students will employ throughout
