Cognition, Communication, and Romantic Relationships James M. Honeycutt, James G. Cantrill, 2014-04-08 This text explores how memory communication social cognition function in the development of romantic relationships and describes the stages of the development For students of close relationships interpersonal communication *Cognition in Close Relationships* Garth J.O. Fletcher, Frank D. Fincham, 2013-05-13 The past decade has witnessed an explosion of interest and research on close relationships and social cognition In both areas numerous handbooks textbooks and journal articles have been published However it is the editors impression that although cognitive theories and concepts have filtered through to research dealing with close relationships much of this research reflects a relatively untutored understanding of the theoretical and empirical work in social cognition Conversely the research literature that provides a more sophisticated perspective on the role of cognition in close relationships typically reveals a relatively limited knowledge of the literature on close relationships As

researchers who have worked in both social cognitive processes and close relationships Fletcher and Fincham are convinced that each field has much to offer the other In fact their book is based on two important postulates first that a social cognitive framework offers a valuable resource for developing our understanding of close relationships and second that studying cognition within close relationships has the potential to inform our understanding of basic social cognitive processes

Theiss, 2005

The Psychology of Love Thiago de Almeida, David L. Rodrigues, 2025-01-16 The topic of loving relationships is one of the most important and often problematic areas of people's lives Unfortunately such importance is best perceived when

relationships are unsatisfactory and or threatened by the possibility of an imminent breakup When that happens our mood our ability to concentrate our energy our work and our health among other dimensions of our lives can be profoundly affected Although contemporary love life appears to be markedly different from that of predecessor generations given the wide range of current relationships as the hook up living together separate cohabitation virtual love or even betrayal among many other forms of loving interaction we live in a time when relationships between two or more people it seems need more understanding and more accurate research However studying love scientifically is a hard task because of methodological difficulties and conceptual improprieties intrinsically related to this type of investigation Because it can be considered such a familiar concept many researchers should agree on what love is and how it can be measured But this is not what occurs After all what is love Is it as a psychological phenomenon capable of being scientifically studied by psychology The goal of this Research Topic is to Promote and disseminate publications related to what is conceived scientifically as the Psychology of Love differing from conceptions related to self help and common sense Conceptualize love through psychological science Systematize knowledge about the nature of love and related phenomena such as jealousy shyness inhibition infidelity and other related topics Understand conceptualizations of love and relationship dynamics of people in monogamous and consensually non monogamous relationships Research the establishment and maintenance of romantic relationships and try to understand scientifically the role of love in marital satisfaction
