Cognitive Approaches To Lexical Semantics:

Cognitive Approaches to Lexical Semantics Hubert Cuyckens, René Dirven, John R. Taylor, 2009-06-23 This collected volume presents radically new directions which are emerging in cognitive lexical semantics research A number of papers re-ignite the polysemy vs monosemy debate and testify to the fact that polysemy is no longer simply taken for granted but is currently a much more contested issue than it was in the 1980s and 1990s Other papers offer fresh perspectives on the prototype structure of lexical categories while generally accepted notions about the radial network structure of categories are questioned in papers on the development of word meaning in child language acquisition and in diachrony Additional topics include the interaction of lexical and constructional meaning and the relationship between word meanings and the contexts in which the words are encountered This book is of interest to semanticists and cognitive linguists as well as to scholars working in the broader field of cognitive science

English Lexical Semantics Zeki Hamawand, 2025-07-24 Offers a novel approach for producing and interpreting lexical semantics hinging on the central assumptions of cognitive linguistics and cognitive semantics

Cognitive Linguistics William Croft, D. Alan Cruse, 2004-01-22 Cognitive Linguistics argues that language is governed by general cognitive principles rather than by a special purpose language module This introductory textbook surveys the field of cognitive linguistics as a distinct area of study presenting its theoretical foundations and the arguments supporting it Clearly organised and accessibly written it provides a useful introduction to the relationship between language and cognitive processing in the human brain It covers the main topics likely to be encountered in a course or seminar and provides a synthesis of study and research in this fast growing field of linguistics The authors begin by explaining the conceptual structures and cognitive processes governing linguistic representation and behaviour and go on to explore cognitive approaches to lexical semantics as well as syntactic representation and analysis focusing on the closely related frameworks of cognitive grammar and construction grammar This much needed introduction will be welcomed by students in linguistics and cognitive science

Cognitive Approaches to English Mario Brdar, Marija Omazić, Višnja Pavičić Takač, 2009-12-14 The present volume contains a selection of papers presented at the conference Cognitive Approaches to English an international event organized to mark the 30th anniversary of English studies at the Faculty of Philosophy Josip Juraj Strossmayer University Osijek which was held in Osijek on October 18-19 2007 The participants were invited to discuss issues in cognitive accounts of English ranging from fundamental to methodological to interdisciplinary and applied The volume is accordingly divided into four parts Part I Motivation in grammar deals with various phenomena in the grammar of English in the broadest sense of the term all of which are shown to be motivated by metaphorical and or metonymic operations Part II Constructing meaning between grammar and lexicon contains five chapters dealing with phenomena ranging from various peculiarities of form meaning pairings such as synonymy polysemy and figurative meanings to concept formation The four chapters that make up Part III are concerned with the phenomenon of interlinguistic and intercultural

variation in the use of metaphorical and metonymic processes The volume is concluded by Part IV the three papers of which attempt to reconsider some TEFL issues from a cognitive linguistic point of view

Corpus Methods for Semantics Dylan Glynn, Justyna A. Robinson, 2014-11-06 This volume seeks to advance and popularise the use of corpus driven quantitative methods in the study of semantics The first part presents state of the art research in polysemy and synonymy from a Cognitive Linguistic perspective The second part presents and explains in a didactic manner each of the statistical techniques used in the first part of the volume A handbook both for linguists working with statistics in corpus research and for linguists in the fields of polysemy and synonymy

New Approaches to Contrastive Linguistics Renata Enghels, Bart Defrancq, Marlies Jansegers, 2020-07-20 The practice of comparing languages has a long tradition characterized by a cyclic pattern of interest Its meeting with corpus linguistics in the 1990s has led to a new sub discipline of corpus based contrastive studies The present volume tackles two main challenges that had not yet been fully addressed in the literature namely an empirical assessment of the nature of the data commonly used in cross linguistic studies e g translation data versus comparable data and the development of advanced methods and statistical techniques suitably adapted to contrastive research settings The papers collected in this volume endeavour to find out what new types of data are most useful for what kind of contrastive questions and which advanced statistical techniques are most suited to deal with the multidimensionality of contrastive research questions Answers to these questions are provided through the contrastive analysis of various language pairs or groups and a wide variety of phenomena situated at almost all linguistic levels In sum this book provides an update on new methodological and theoretical insights in empirical contrastive linguistics and will stimulate further research within this field
