Cognitive-behavioral Therapy For Impulsive Children:

Cognitive-behavioral Therapy for Impulsive Children Philip C. Kendall, Lauren Braswell, 1993-03-26 Kendall and Braswell have designed and developed specific procedures that can improve children's self control and reduce their impulsivity. In this second edition the authors both expand and focus the application of their program involving parents and teachers to a greater extent making greater use of hands-on workbook materials and adapting and implementing procedures for children with a wide range of behavior problems linked to impulsivity. The present edition also provides in greater detail descriptions of treatment strategies in session therapy materials, case examples, and illustrative transcripts. This book will be of great value to child and family psychologists, social workers, educators, and psychiatrists, as well as parents, pediatricians, classroom teachers, and others who frequently encounter impulsive children. This book also serves as an excellent ancillary text for courses in clinical child psychology, school psychology, educational interventions, applied developmental psychology, and other mental health-related classes.

Cognitive-behavioral Therapy for Impulsive Children Philip C. Kendall, Lauren Braswell, 1985. This accessible, informative book presents an approach that has been used successfully by thousands of clinicians to help children reduce impulsivity and improve their self control. In-depth descriptions of treatment strategies are brought to life with case examples and illustrative transcripts. The authors' model can be applied in a variety of settings and with different populations of children, including those with ADHD, conduct disorder, and learning disabilities. Grounded in the proven techniques of cognitive-behavioral therapy, this is an invaluable resource for anyone working with children who need to learn to stop and think before they act.
