*Essays in Cuban Intellectual History* R. Rojas, 2008-03-17 Well known essayist and Cuban historian Rafael Rojas presents a collection of his best work one which focuses on and offers alternatives to the central myths that have organized Cuban culture from the nineteenth century to the present Rojas explores the most important themes of Cuban intellectual history including the legacy of Jos Mart the cultural effect of the war in 1898 the construction of a national canon of Cuban literature the works of classical intellectuals of the republican period the literary magazine Or genes the ideological impact of the Cuban Revolution and the possibilities of a democratic transition in the island at the beginning of the twenty first century

Culture and the Cuban State Yvon Grenier, 2017-11-08 Culture and the Cuban State examines the politics of culture in communist Cuba It focuses on cultural policy censorship and the political participation of artists writers and academics such as Tania Bruguera Jes s D az Rafael Hern ndez Kcho Reynier Leyva Novo Leonardo Padura and Jos Toirac The cultural field is important for the reproduction of the regime in place given its pretense and ambition to be eternally revolutionary and to lead a genuine cultural revolution Cultural actors must be mobilized and handled with care given their presumed disposition to speak their mind and to cherish their autonomy This book argues that cultural actors also seek recognition by the main for a long time the only sponsor and patron of the art in Cuba the curator state The curator state is also a gatekeeper state arbitrarily and selectively opening and closing the space for public expression and for access to foreign currencies and the global market The time when everything was either mandatory or forbidden is over in Cuba The regime seems to have learned from egregious mistakes that led to a massive exodus of artists writers and academics In a country where things change so everything could stay the same the controlled opening in the cultural field playing on the actors ambition and fear illuminates a broader phenomenon the evolving rules of the political game in the longest standing dictatorship of the hemisphere

El otro rock mexicano David Cortés, 1999 *Cartografías literarias del exilio* José Ismael Gutiérrez, 2005 This study deals with the experience of exile in the works of three Spanish American writers The Cuban authors Reinaldo Arenas and Manuel Díaz Martínez as well as the Uruguayan author Fernando Ainsa Along with the reshaping of territories and socio economic and cultural dimensions which took place on a worldwide scale the last few decades have also witnessed a reshaping of the spectrum and voices of Latin American writers that create revisit and suffer the complex and multifaceted phenomenon of exile The displaced subject or rather the voices of the displaced the marginalized and the excluded rise up from a fringe that for various reasons or motives will always represent a place that lies beyond the borders imaginary or real of the spatial political cultural linguistic and sexual communities to which they subscribe And these voices regardless of the grouping to which they belong and the choices on which they base the necessity or purpose of their expressive survival map out a work that while being personal in its origins speaks to a more general

context exile and about exile provided that we draw a distinction between these two facets to the extent that it is possible by having regard to thematic nuances and gradations that give substance to the journeys that mould diatopic variations in the discourses of the uprooted. And it is necessary to speak in plural because beyond the characteristics or common motives of nationalities and the political fortunes that have left their mark on entire generations of exiles, exile as a phenomenon responds to the rootlessness in itself, the blank spaces and the lack of linguistic affective and cultural continuity with strategies, identity masks and tactics for representation and resistance that infuse each of these idiosyncratic discourses. Hence its originality and intrinsic solitude, hence its penitence and hence also its familiar and irreplaceable expressive uniqueness. It does not take much reflection to conclude that Latin American literature has and continues to emanate predominantly from internal or territorial exiles, historiography of Latin America towers above the founding moments and extends far beyond the consolidation of the nation states. Think of a work such as *El Facundo* by the Argentine writer Domingo Faustino Sarmiento, written in the style of a political pamphlet in an attempt to justify the ostracism that the author suffered, thereby initiating in more ways than one the narrative of the American subcontinent and its peculiar combination of genres. Think also of the journeys of Pablo Neruda, Gabriela Mistral and Julio Cortázar amongst other intellectuals, not to mention the vast list of travellers in the 19th century who set out to explore large parts of the American and European continents, travelling as far as the Middle East or exile in reverse, experiencing its destabilising face stirred up by the cultural agendas projected onto the literary establishment by the ruling elites, as occurred in the Rio de la Plata towards the end of the last century. The demands that stem from violence and the devastating side effects of globalisation have transformed the Latin America of our day into a continent of emigration. And it is a fact that those aspects which shape the identity of the field of literature have had to undergo significant short term and long term reassessments in order to assimilate new cultural centres of gravity and heterogenous cultural elements. The work presented here by Jose Ismael Gutierrez shares a similar concern, namely the need for research which for some time has been enriching the Latin American literary bibliography in these parts as never before. However, careful consideration reveals that this study is linked to one of the essential discursive categories of the literary phenomenon in the history of our literature, namely territorial displacement as a system, involuntary displacement and the stigma of exclusion. The author possesses an ample theoretical and historic background for his research of some of the many figures that serve as conduits for the writings of exiles on Latin American soil; assessments are alternated with points of view drawn from sociology, politics, philosophy, psychology and culture in general. This studious Spaniard, with his keen observations, demonstrates his profound knowledge of the various periods in the literature of the New World, having previously sufficiently proven his command of the field with an exceptional list of academic essays and articles on the 19th and 20th century which were published in these latitudes. Such experience and scholarship seem to me to be a necessary condition for understanding the evolution of the literature and culture of Latin America from its roots and also from a global

perspective in other words without restricting one's point of view to regional or generational phenomena which though interesting are but of limited importance which Professor Gutierrez devotes the following three sections the Cuban authors Reinaldo Arenas and Manuel Diaz Martinez as well as the Uruguayan author Fernando Ainsa and the unusual manner in which their respective contributions are presented each one from certain historic cultural coordinates and from an own interpretative angle extend a forceful and novel invitation to the reader whose intelligence and aesthetic sensibilities will be engaged while being guided page after page along the various experiences of certain concrete real life exiles whose experiences are physical external and geographical while at the same time being internal and spiritual These exiles open up brilliant areas of discussion which the critical lucidity of the researcher once again transforms into an essential and penetrating lesson on the most complex dimensions of contemporary and earlier Latin American literature

**Letras libres**, 2008 **El venado y el colibri** Eduardo Sancho, David Escobar Galindo, 1996 Social, Political, and Religious Movements in the Modern Americas Pablo A. Baisotti, 2021-12-30 This volume explores several notable themes related to social political and religious movements in Latin America and offers insightful historical perspectives to understand national regional and global issues from the beginning of the twentieth century to the present day This volume's collected chapters focus on the Latin American society and are divided into three sections The first section Social presents some cultural demographic and urban changes that have occurred with increasing frequency in Latin America from the early twentieth century onward The second section Political shows migratory political and identity movements that in recent decades have re-emerged with force Finally the third section Religious analyzes various Latin American religious visions with their particular characteristics From the religious hegemony of Catholicism a change in the religious panorama in the last decades can be seen intermingled with politics history and society
