Collateralized debt obligations Markus Lorenz, 2008-10-22 Inhaltsangabe Abstract This work aims to give the reader a holistic introduction to Collateralized Debt Obligations CDOs an asset category which has recently experienced both popularity and criticism Collateralized Debt Obligations represent a subset of asset backed securities As opposed to classical types of asset backed securities like mortgage backed securities or credit card debt backed securities a Collateralized Debt Obligation is a vehicle transforming bank loans or commercial paper into tranches of traded securities While Collateralized Debt Obligations have been an established part of the U S fixed income market it was only recently that academics showed interest in this asset category From an asset pricing standpoint CDOs represent a challenge as credit risk from a heterogeneous pool is passed through to tranches Hence asset pricing models have to account for expected defaults and default correlation on the one hand while incorporating the structural support the CDO is offering to the debt tranches on the other Also regulatory agencies such as the Basel Committee on Banking Supervision have increasingly covered CDOs and their use in credit risk management thus further stimulating interest in this asset category The report is mainly organized in three parts The first part presents the basic ideas of Collateralized Debt Obligation as well as their structure

and principal economics Part II is the core of the report focusing on the aforementioned asset pricing problem and presenting various models to cope with it Finally the third part presents some of the multifaceted applications of Collateral Debt Obligations and concludes with an outlook for the product category Here special focus is laid on the European and German market as this is seen as a major area for growth Inhaltsverzeichnis Table of Contents Index of figuresv Index of tablesvi Prefacevii 1 INTRODUCTION1 1 1Definitions1 1 2Mathematical Classification2 1 3Purpose and Relevance of CDOs4 1 4Motivation and Aim of the Study6 2 STRUCTURE AND DESIGN OF CDOS8 2 1Underlying Assets9 2 2Tranches10 2 3Purpose11 2 3 1Risk Transfer11 2 3 2Credit Risk Pricing Arbitrage11 2 4Credit Structure13 2 4 1Market Value Structure13 2 4 2Cash Flow Structure13 2 5Summary and Typical CDO Structures15 3 RATIONALE AND ECONOMIC FEATURES18 3 1Incentives to enter CDO Contracts19 3 1 1Comparative Advantages in Holding Specific Risks19 3 1 2Incentives for Equity

A Primer on Synthetic Collateralised Debt Obligations Didier Joannas, Moorad Choudhry, 2003 The Collateralized Debt Obligation CDO was a natural development in securitisation first introduced in 1988 A CDO is a structured finance product in which a distinct legal entity known as a special purpose vehicle issues bonds or notes against an investment in cash flows of an underlying pool of assets These assets can be bonds commercial bank loans or a mixture of both bonds and loans Originally CDOs were developed as repackaging structures for high yield bonds and illiquid instruments such as certain convertible bonds but they have developed into sophisticated investment management vehicles in their own right Through the 1990s CDOs were the fastest growing asset class in the asset backed securities market due to a number of features that made them attractive to issuers and investors alike A subsequent development was the synthetic CDO a structure that combines credit derivatives and securitization technology in its construction It has become very popular with banks and fund managers both from an originator and investor perspective considering the genesis of the CDO principally the economic advantages of these products for both issuers and investors It then looks at the products themselves and concludes with case studies of selected CDO transactions
