

The book cover features a dark green background. At the top, there is a detailed architectural drawing of a dome, possibly a theater or concert hall, rendered in a lighter green color. The drawing shows the interior structure, including the dome's ribs and the surrounding walls. Below the dome, the background transitions into a topographic map with concentric contour lines. Several numbers are scattered across the map, including 1, 5, 6, 8, 9, and 12. The title and author's name are printed in white, serif capital letters, centered over the dome drawing.

Excerpt from *Collected Papers on Acoustics* This volume aims to contain all the important contributions to the subject of acoustics from the pen of the last Professor W C Sabine The greater part of these papers appeared in a number of different architectural journals and were therefore addressed to a changing audience little acquainted with physical science and to whose members the subject was altogether novel Under these circumstances a certain amount of repetition was not only unavoidable but desirable Little attempt has been made to reduce this repetition but in one case an omission seemed wise The material contained in the author s earliest papers on acoustics which appeared in the Proceedings of the American Institute of Architects in 1898 is repeated almost completely in the paper which forms the first chapter of this volume it has therefore been omitted from this collection with the exception of a few extracts which have been inserted as footnotes in the first chapter No apology is made for the preservation of the paper from the Proceedings of the Franklin Institute for though much of the material therein is to be found in the earlier chapters of this volume the article is valuable as a summary and as such it is recommended to the reader who desires to obtain a general view of the subject In addition to the papers already in print at the time of the author s death the only available material consisted of the manuscripts of two articles one on Echoes the other on Whispering Galleries and the full notes on four of the lectures on acoustics delivered at the Sorbonne in the spring of 1917 Of this material the first paper was discarded as being too fragmentary the second after some slight omissions and corrections in the text made necessary by the loss of a few of the illustrations forms Chapter 11 of this volume an abstract of so much of the substance of the lecture notes as had not already appeared in print has been made of which part is to be found in the form of an Appendix and part is contained in some of the following paragraphs The reader may often be puzzled by reference to works about to be published but of which no trace is to be found in this volume About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Collected Papers On Acoustics* W.C.
