affable tone *Making Music in Montessori* is the Guide's guide to music education providing Montessori teachers all at once a snappy practical handbook, music theory, mentor, pedagogical manual, and resource anthology. The book's goal: To give teachers confidence in music so that when their children walk away from a lesson, all fired up to compose their own music, their teacher will know how to guide them. Before *Making Music in Montessori*, teachers may have only dreamed of a classroom buzzing with children working, learning, and growing with music alongside all of the other subject areas in the Montessori curriculum. Now it's a reality. If children's minds are a fertile field, then *Making Music in Montessori* will stir Montessori teachers of all musical backgrounds to don their overalls, roll up their sleeves, sow the musical seeds, and watch them blossom under their children's flaming imagination.

Living in Worlds of Music Minette Mans, 2009-09-22. Informed by her in-depth ethnomusical knowledge, the result of detailed fieldwork, Mans's book is about musical worlds and how we as people inhabit them. The book asserts that an understanding of our musical worlds can be a transformative educational tool that could have a significant role to play in multicultural music and arts education. She explores the way in which musical expression, with its myriad cultural variations, reveals much about identity and cultural norms and shows how particular musical sounds are aesthetically related to these norms. The author goes further to suggest that similar systems can be detected across cultures while each world remains colored by a distinctive soundscape. Mans also looks at the way each cultural soundscape is a symbolic manifestation of a society's collective cognition, sorting musical behavior and sounds into clusters and patterns that fulfill each society's requirements. She probes the fact that in today's globalized and mobile world, as people move from one society to another, cross-cultural acts and hybrids result in a number of new aesthetics. Finally, in addition to three personal narratives by musicians from different continents, the author has invited scholars from diverse specializations and locations to comment on different sections of the book, opening up a critical dialogue with voices from different parts of the globe. Musical categorization, identity, values, aesthetic evaluation, creativity, curriculum, assessment, and teacher education are some of the issues tackled in this manner.

Creating Music and Sound for Games G. W. Childs, 2007. *Creating Music and Sound for Games* is about mastering the unique creative challenges faced by musicians and sound designers new to the field of composing music for computer and console games. In addition to covering the artistic angle, this book helps the reader choose the right hardware and software for composing music for games. Tutorials teach readers to develop music and audio cues to match the varying action in a game and how to successfully synchronize and format their compositions for the game industry. Finally, the book offers practical advice on breaking into the business.
