Creating The Monastic Past In Medieval Flanders:

Creating the Monastic Past in Medieval Flanders Karine Ugé, 2005 Examination of the self produced histories of a number of religious communities tracing out the complex reasons for their composition The creation of a past for themselves was of pressing importance to religious communities enabling them to increase their status and legitimise their existence This book examines the process in a group of communities from the southern part of Flanders the monks of Saint Bertin at Saint Omer the community of Saint Rictrude at Marchiennes and the canons of Saint Am at Douai over a period running from the ninth to the end of the eleventh century The central contention is that the communities produced their narratives history hagiography charter materials for a specific time and purpose frequently as a response to or intended resolution of internal or external crises The book also discusses how the circumstances which triggered narrative production had an impact not only on the content but also on the form of the texts

Hariulf's History of St Riquier, 2024-07-09 A new and accessible translation of Hariulf s History of St Riquier this book examines the history of a monastic community from the seventh to the eleventh century It covers the ascetic life of the founding saint and the development of the community under the Carolingians in the late eighth and ninth centuries There were setbacks when the house was sacked by the Vikings and the founder s relics were stolen for political ends but it recovered in the tenth and eleventh centuries and developed the links with both the Norman and English courts that enable Hariulf to make interesting observations about the Norman Conquest of England Hariulf s description of the monastic site with its three churches and the liturgical arrangements practised there as well as the relics treasures books and endowments of a great monastic foundation make his history an important source for monastic history

Deeds of the Abbots of St Albans James G. Clark, 2019 The Deeds of the abbots of St Albans records the history of one of the most important abbeys in England closely linked to the royal family and home to a school of distinguished chroniclers including Matthew Paris and Thomas Walsingham It offers many insights into the life of the monastery its buildings and its role as a maker of books and covers the period from the Conquest to the mid fifteenth century The Deeds of the abbots of St Albans is the longest continuous chronicle of a medieval monastery in England following its fortunes from its first foundation in the wake of the first Viking raids to its status as a proud and prosperous pillar of the church establishment more than six centuries later More than merely a common conventual annal the Deeds drew contributions from the most accomplished chroniclers of the St Albans school including Matthew Paris Thomas Walsingham and perhaps William Rishanger It is a history of one of the most important abbeys under royal patronage and always at the apex of the church hierarchy it also offers a glimpse of life inside the monastic community from the Conquest to within a century of the Dissolution There are detailed descriptions of the building and rebuilding of the abbey church and recounts the abbey s commitment to the making of books from the first flowering of the scriptorium in the twelfth century when a famous psalter was made for the anchorite Christina of Markyate to its Indian summer in the years before 1400 under Thomas Walsingham

himself There are rare snapshots of the daily routine of the monks their liturgical observances their interactions with their staff tenants townspeople and guests And it captures the colour and character of the celebrated figures seen at the abbey from King John to Edward the Black Prince *Jaarboek voor middeleeuwse geschiedenis 14 (2011)* A. Cathedrals, Communities and Conflict in the Anglo-Norman World Paul Dalton, Charles Insley, Louise J. Wilkinson, 2011 The true importance of cathedrals during the Anglo Norman period is here brought out through an examination of the most important aspects of their history Cathedrals dominated the ecclesiastical and physical landscape of the British Isles and Normandy in the middle ages yet in comparison with the history of monasteries theirs has received significantly less attention This volume helps to redress the balance by examining major themes in their development between the eleventh and thirteenth centuries These include the composition life corporate identity and memory of cathedral communities the relationships sometimes supportive sometimes conflicting that they had with kings e g King John aristocracies and neighbouring urban and religious communities the importance of cathedrals as centres of lordship and patronage their role in promoting and utilizing saints cults e g that of St Thomas Becket episcopal relations and the involvement of cathedrals in religious and political conflicts and in the settlement of disputes A critical introduction locates medieval cathedrals in space and time and against a backdrop of wider ecclesiastical change in the period Contributors Paul Dalton Charles Insley Louise J Wilkinson Ann Williams C P Lewis Richard Allen John Reuben Davies Thomas Roche Stephen Marritt Michael Staunton Sheila Sweetinburgh Paul Webster Nicholas Vincent **Reform, Conflict, and the Shaping of Corporate Identities** Steven Vanderputten, 2013 This book contains ten previously published essays dealing with the development of Benedictine monasticism between c 1050 1150 Relying on primary sources that originated in communities situated in the Southern Low Countries one of the densest regions of Benedictine occupation and a crossroads of cultural and political influences the essays are arranged in three thematic sections The first looks at the societal background methodologies and intended outcomes of Cluniac reform around 1100 The second section investigates reactions to reform

both within the monastic sphere and by outsiders In the third section the focus is on groups of monks and how they their supporters and their enemies all developed strategies of self representation and self positioning in the face of growing competition over landed wealth patronage and positions of social privilege Series Vita Regularis Regulations and Interpretations of Religious Life in the Middle Ages Treatises Ordnungen und Deutungen religiosen Lebens im Mittelalter Abhandlungen Vol 54 *Mobile Saints* Kate M. Craig,2021-04-22 *Mobile Saints* examines the central medieval ca 950 1150 CE practice of removing saints relics from rural monasteries in order to take them on out and back journeys particularly within northern France and the Low Countries Though the permanent displacements of relics translations have long been understood as politically and culturally significant activities these temporary circulations have received relatively little attention Yet the act of taking a medieval relic from its home even for a short time had the power to transform the object the people it encountered and the landscape it traveled through Using hagiographical and liturgical texts this study reveals both the opportunities and tensions associated with these movements circulating relics extended the power of the saint into the wider world but could also provoke public displays of competition mockery and resistance By contextualizing these effects within the discourses and practices that surrounded traveling relics *Mobile Saints* emphasizes the complexities of the central medieval cult of relics and its participants while speaking to broader questions about the role of movement in negotiating the relationships between sacred objects space and people **Before the Gregorian Reform** John Howe,2016-04-01

Historians typically single out the hundred year period from about 1050 to 1150 as the pivotal moment in the history of the Latin Church for it was then that the Gregorian Reform movement established the ecclesiastical structure that would ensure Rome s dominance throughout the Middle Ages and beyond In *Before the Gregorian Reform* John Howe challenges this familiar narrative by examining earlier pre Gregorian reform efforts within the Church He finds that they were more extensive and widespread than previously thought and that they actually established a foundation for the subsequent Gregorian Reform movement The low point in the history of Christendom came in the late ninth and early tenth centuries a period when much of Europe was overwhelmed by barbarian raids and widespread civil disorder which left the Church in a state of disarray As Howe shows however the destruction gave rise to creativity Aristocrats and churchmen rebuilt churches and constructed new ones competing against each other so that church building like castle building acquired its own momentum Patrons strove to improve ecclesiastical furnishings liturgy and spirituality Schools were constructed to staff the new churches Moreover Howe shows that these reform efforts paralleled broader economic social and cultural trends in Western Europe including the revival of long distance trade the rise of technology and the emergence of feudal lordship The result was that by the mid eleventh century a wealthy unified better organized better educated more spiritually sensitive Latin Church was assuming a leading place in the broader Christian world *Before the Gregorian Reform* challenges us to rethink the history of the Church and its place in the broader narrative of European history Compellingly written and

generously illustrated it is a book for all medievalists as well as general readers interested in the Middle Ages and Church history

England in Europe Elizabeth Muir Tyler, 2017-05-08 In *England in Europe* Elizabeth Tyler focuses on two histories the *Encomium Emmae Reginae* written for Emma the wife of the thelred II and Cnut and *The Life of King Edward* written for Edith the wife of Edward the Confessor Tyler offers a bold literary and historical analysis of both texts and reveals how the two queens actively engaged in the patronage of history writing and poetry to exercise their royal authority Tyler s innovative combination of attention to intertextuality and regard for social networks emphasizes the role of women at the centre of Anglo Saxon and Anglo Norman court literature In doing so she argues that both Emma and Edith s negotiation of conquests and factionalism created powerful models of queenly patronage that were subsequently adopted by individuals such as Queen Margaret of Scotland Countess Adela of Blois Queen Edith Matilda and Queen Adeliza *England in Europe* sheds new light on the connections between English French and Flemish history writing and poetry and illustrates the key role Anglo Saxon literary culture played in European literature long after 1066
