Systems for Sustainability Frank A. Stowell, Ray L. Ison, Rosalind Armson, Jacky Holloway, Sue Jackson, Steve McRobb, 2013-11-11 The term sustainability has entered the lexicon of many academic disciplines and fields of professional practice but to date does not appear to have been seriously considered within the systems community unless perhaps under other guises Within the wider community there is no consensus around what sustainability means with some authors identifying 70 to 100 definitions of the term Some see sustainability as the precise and quantifiable outcomes of biological systems whilst others see it in terms of processes relevant to personal and organizational change with the potential to effect changes in our relationships with our environments Internationally it has been increasingly used in relation to the term sustainable development a term popularised by the Brundtland Commission's report in 1987 entitled *Our Common Future* Despite this diversity and polarised perception on its utility unlike many other popular terms it has not had its time and subsided quietly from our language It is therefore timely for the systems community to explore the relationship between systems and sustainability in a range of contexts Participants in this the 5th International Conference of the United Kingdom Systems Society UKSS have been invited to reflect critically on the contribution of systems thinking and action to sustainability to the sustainability of personal relationships the organizations in which live and work and our natural environment

Working in Organisations Andrew Kakabadse, John Bank, 2018-12-20 First published in 2004 this volume recognises that as society changes so must its organisations as organisations change so must their management competencies The requirement for organisations to be flexible innovative and adaptable in environments of increasing complexity and uncertainty is also a requirement of any organisation's most essential resource its people They not only work for the organisation they are the organisation The second edition of this highly successful book provides a comprehensive and thought provoking examination of the operational and strategic skills demands and responsibilities of the modern workforce and in particular its management Reflected here are the manager's new and changing priorities Attention is given to the manager's role the motivation to work and succeed and teamworking Also emphasised is the new psychological contract highlighting reliance on self whilst maintaining sensitivity to diversity concerns Providing clear and decisive leadership requires the projection of a vision that captures the imagination of others but inevitably managers face conflict and adversity *Working in Organisations* therefore discusses how power and politics can be moulded to positive advantage The challenges facing organisations go beyond cost and profitability as political and environmental challenges have forcefully entered into managerial responsibility The book asks What is the ultimate purpose and contribution of organisations and highlights profound governance and ethics concerns The design of organisations is also explored and how creating

appropriate structures will in turn focus resources to achieve desired ends This book provides a broad coverage of key issues ranging from a close examination of the manager s job to a discussion of the corporate and social forces that determine our lives Written in an easy to read style and bursting with case examples Working in Organisations acts as mentor and guide to those whose quest is for ever greater sustainable accomplishment Written by a distinguished team of authors this book will continue to be welcomed as the definitive text on organisational culture and change for academics researchers and managers around the world

Managing 21st Century Libraries Lyndon Pugh,2005 It seems that being in a state of uncertainty is the overwhelming characteristic of library organizations today but there are ways in which this can be used to improve our organizations The power of negative capability is that it supports reflection and measured thinking and in the right sort of organization it will release creative energy This book presents the characteristics of those organizations Managing 21st Century Libraries is primarily concerned with creating the circumstances in which people can maximize the use of their talents and generating the opportunities for people to work with others in ways that engage all of the abilities of everyone involved It is about developing an organization that is an interesting stimulating provocative and effective place to work Above all the book is about the ways in which library managers and staff can develop systems for managing contemporary library services and thus take advantage of the unique combination of circumstances that provide the potential for innovative organization development in the library services of today It relates important issues in people management to the characteristics of libraries that deal significantly with both digital and printed material
