The Yale Alumni Weekly, 1930 *Jonathan Edwards's Theology: A Reinterpretation* Kyle C. Strobel, 2012-11-29 This volume provides an interpretative key to Jonathan Edwards's theology developed from within his own doctrinal constructs Strobel offers a dogmatic exposition of Edwards's theology by unveiling the trinitarian architecture of his thought Building upon this analysis Strobel applies his construct to reinterpret three key areas of redemption debated widely in the secondary literature spiritual knowledge regeneration and religious affection In order to achieve this purpose Strobel's approach is theological rather than philosophical employing Edwards's self confession as a Reformed theologian to guide his analysis In advancing a theological reading of Edwards Strobel focuses on the systematic nature of Edwards's theology ordering it according to his doctrinal affirmations This necessitates as many Edwards scholars now affirm a primary focus on Edwards's trinitarian theology where the Trinity serves as the key ontological principle which orders the whole of his doctrinal construction By grounding the interpretive key in Edwards's understanding of the Trinity Strobel's idiosyncratic exposition of his doctrine of the Trinity serves to recast Edwards's theology in a new light

Edgar Holden, M.D. of Newark, New Jersey: Provincial Physician on a National Stage Sandra W. Moss, 2014-09-30 Edgar Holden M D of Newark Provincial Physician on a National Stage is a study of medicine and health in Essex County New Jersey and its largest city Newark in the decades following the Civil War The book is structured around the multifaceted career of Edgar Holden a Newark physician who transcended the provinciality that characterized Essex County's medical community and institutions The author demonstrates how institution building and new paradigms of medical authority funneled from burgeoning urban medical centers into the provincial and sluggish medical landscape of northern New Jersey

The lack of a medical school within the state stymied the intellectual and professional ferment that the best nineteenth century American medical schools attracted and fostered. New York City with its medical institutions and elite practitioners cast a giant shadow over northern New Jersey which consequently has been somewhat neglected by historians of medicine. An exploration of this lively community of welltrained practitioners, fledgling institutions and ailing citizens sheds light on similar medical communities that found themselves importing but rarely exporting medical knowledge and expertise.
