

# Desk Ergonomics

## Preventing Musculoskeletal Disorders

Do you know what the risks are when working at a desk for prolonged periods? Do you know how display screen equipment should be arranged so users can work without experiencing strain whilst at their workstation?

## Stretching and breaks

- DSE users should get up at least once an hour so to stretch and change their position.
- DSE users should carry out small exercises at or away from their desk to prevent prolonged strain.
- Users should take their designated breaks and break up long periods of DSE work with other tasks.

### Why?

Regular stretching will relieve tension and strain, while breaks will give their body a chance to relax and recuperate after intense work periods.
