Neuropolitics William E. Connolly, 2002-07-24 Why would a political theorist venture into the nexus between neuroscience and film According to William Connolly whose new book is itself an eloquent answer the combination exposes the ubiquitous role that technique plays in thinking ethics and politics By taking up recent research in neuroscience to explore the way brain activity is influenced by cultural conditions and stimuli such as film technique Connolly is able to fashion a new perspective on our attempts to negotiate and thrive within a deeply pluralized society whose culture and economy continue to quicken In Neuropolitics Connolly draws upon recent brain body research to explore the creative potential of thinking the layered character of culture the cultivation of ethical sensibilities and the critical role of technique in all three He then shows how a series of films including Vertigo Five Easy Pieces and Citizen Kane enhances our appreciation of technique and contests the linear image of time now prevalent in cultural theory Connolly deftly brings these themes together to support an ethos of deep pluralism within the democratic state and a politics of citizen activism across states His book is an original and rigorous study that attends to the creative possibilities of thinking in identity culture and ethics

The Politics of Speed Simon Glezos,2013-03-01 Everyone agrees that the world is accelerating With advances in communication transportation and information processing technologies it is clear that the pace of events in global politics is speeding up at an alarming rate The implications of this new speed however continue to be a significant source of debate Will acceleration lead to a more interconnected productive peaceful and humane world or a nightmarish descent into ecological devastation economic exploitation and increasingly violent warfare The Politics of Speed attempts to map the contours of the new global space of speed and investigates key issue areas including democratic governance warfare capitalism globalization and transnational activism to uncover the ways in which acceleration is shaping the world The book uses contemporary political theory especially the works of Deleuze and Guattari to develop an ontological account of speed showing how its effects are frequently far more complex and surprising than we might expect The result is an attempt to craft a way of engaging with global acceleration that might help avoid the dangers of speed while embracing the possibilities it provides us with to produce a safer more egalitarian democratic and pluralistic world
