technique has a strong foundation in science and evolutionary biology and is designed to work directly in the cognitive gap
between the reptilian complex responding to a trigger such as a stressful situation and the individual becoming aware of
what's happening. This enables the individual to overwrite whatever problem they're experiencing with new information and
in this book Terence Watts details the steps of the procedures to help you achieve this outcome. You'll discover the how and
why of the technique's efficiency and after an experiential exercise to whet your appetite Terence then presents the
procedures to help you tackle a range of different challenges including: Preparing to get the very best out of the major
changes you're going to make; Boosting your self-worth; what you've been taught about yourself shapes what you think about
yourself but a lot of it is fake news; Understanding anxiety in all its different forms, why we have it and why we just don't need
it most of the time; Dealing with the simple phobia even when it seems far from simple and getting rid of it for good;

self is the liberation of the image of God in us. This study explores that process in the context of a few of Merton's works,
showing his own development from pious hostility to the world to a more humbling acceptance of humanity. The first full-
