Davis,2014 The Spanish Influenza Pandemic of 1918 1919 sheds new light on what the World Health Organization described as the single most devastating infectious disease outbreak ever recorded by situating the Iberian Peninsula as the key point of connection both epidemiologically and discursively between Europe and the Americas The essays in this volume elucidate specific aspects of the pandemic that have received minimal attention until now including social control gender class religion national identity and military medicine s reactions to the pandemic and its relationship with civilian medicine all in the context of World War I As the authors point out however the experiences of 1918 19 remain persistently relevant to contemporary life particularly in view of events such as the 2009 H1N1 swine flu pandemic Contributors Mercedes Pascual Artiaga Catherine Belling Josep Bernabeu Mestre Ryan A Davis Esteban Domingo Magda Fahrni Hern n Feldman Pilar Le n Sanz Maria Lu sa Lima Maria deF tima Nunes Mar a Isabel Porras Gallo Anny Jackeline Torres Silveira Jos Manuel Sobral Paulo Silveira e Sousa Christiane Maria Cruz de Souza Mar a Isabel Porras Gallo is Professor of History of Science in the Medical Faculty of Ciudad Real at the University of Castile La Mancha Spain She is the author of Un reto para la sociedad madrileña a la epidemia de gripe de 1918 1919 and co editor of El drama de la polio Un problema social y familiar en la España franquista Ryan A Davis is Assistant Professor in the Department of Languages Literatures and Cultures at Illinois State University He is the author of The Spanish Flu Narrative and Cultural Identity in Spain 1918 **Humans Versus Nature** Daniel R. Headrick,2020 Since the appearance of Homo sapiens on the planet hundreds of thousands of years ago human beings have sought to exploit their environments extracting as many resources as their technological ingenuity has allowed As technologies have advanced in recent centuries that impulse has remained largely unchecked exponentially accelerating the human impact on the environment Humans versus Nature tells a history of the global environment from the Stone Age to the present emphasizing the adversarial relationship between the human and natural worlds Nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance Daniel R Headrick shows how environmental changes epidemics climate shocks and volcanic eruptions have molded human societies and cultures sometimes overwhelming them At the same time he traces the history of anthropogenic changes in the environment species extinctions

global warming deforestation and resource depletion back to the age of hunters and gatherers and the first farmers and herders He shows how human interventions such as irrigation systems over fishing and the Industrial Revolution have in turn harmed the very societies that initiated them Throughout Headrick examines how human driven environmental changes are interwoven with larger global systems dramatically reshaping the complex relationship between people and the natural world In doing so he roots the current environmental crisis in the deep past

Empire of Brutality Christopher Michael Blakley,2023 Christopher Blakley s *Empire of Brutality* is a human animal history of slaving and slavery in the Atlantic World between the end of the seventeenth century and the abolition of the Atlantic trade in 1808 His multidisciplinary study examines how varied relationships between enslaved people and animals led to the dehumanization and racialization of people of African descent in the Americas Blakley discusses the role of animal exchanges among slavers in West Africa the knowledge and curiosity of enslaved specimen collectors in the Atlantic world regimes of labor on Caribbean and Chesapeake plantations and the forms of resistance that enslaved people engaged in by injuring killing stealing and thinking about animals His analysis provides a better understanding of why enslaved people emphasized in their writing how slaveholders compared them to animals suggesting that critiques of slavery as dehumanizing by people of African descent were to a marked degree the result of these material human animal networks and linkages Blakley s study brings together disparate geographies including the castle trade in Atlantic Africa slave depots in New Spain and plantations in the British Caribbean and Chesapeake worlds to build on the emerging literature of human animal studies and new scholarship in early American environmental history His work is among the first to approach human animal networks under slavery systematically and comprehensively It makes a significant contribution by historicizing human animal relations produced by Atlantic wide networks of slavery It also provides an analysis of these linkages that over time led to the racialization and dehumanization of people of African descent as animal like subjects In this way his work offers an important environmental and material basis for the rich scholarship on the ideological and intellectual origins of race and racism It also illuminates the divergent affective responses of enslaved people towards animals ranging from curiosity to disgust and empathy
