Part I examines the original Froebelian principles and practices in early childhood education in different parts of the world. Part II presents case studies development projects and practitioner publications exploring Froebelian approaches to early childhood education. Part III details research studies which document debate and evaluate Froebelian approaches. Part IV considers how Froebelian approaches might be sustained and adapted for use in various cultural contexts across the world. Part V offers a re articulation of research and policy. An essential resource for in service and future practitioners researchers and policy makers involved in early childhood education this key text will promote discussion aid analysis and further the practical application of Froebelian principles.
