Design-Based School Improvement Rick Mintrop, 2020-08-12 At the heart of the effort to enact and scale up successful school reforms is the need for more robust links between research and practice One promising approach is design development a methodology widely used in other fields and only recently adapted to education which offers a disciplined process for identifying practical problems assessing evidence of outcomes accounting for variability in implementation and results and establishing a foundation for broader understanding of the problem and proposed solutions This exciting new book provides a practical guide for education leaders who are seeking to address issues of equity in their schools and want to pursue this approach The book provides a step by step description of the process augmented by case studies of four education leaders Christine a middle school principal who is concerned with the volume of disciplinary referrals in her school Michelle an elementary school principal who wants to address achievement gaps Eric an assistant superintendent who wants to improve the quality of principals instructional feedback to teachers and Nora a high school principal who is concerned about the use of racial and homophobic slurs in the hallways The book follows each of these leaders as they formulate and refine interventions to address these problems Design Based School Improvement also includes a series of excursions into theory that discuss the research basis for design based improvement The author a leading

thinker about policy implementation and school reform shows a profound appreciation for the complexity of work in schools and the deep and sustained thinking entailed in undertaking productive change By bringing theory to life and putting it in the hands of skilled practitioners this book promises to become an invaluable resource for education leaders seeking to solve problems of equity and social justice in schools

Second International Handbook of Educational Leadership and Administration Kenneth A. Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980 s combined with a widespread belief in leadership as the single most powerful contribution to such improvement The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development
