crucial to understanding what makes southerners invest so much meaning in their regional identity From the late nineteenth century invention of southern tradition to early twenty first century folk artistic creativity Wilson examines a wide range of cultural expression including music literature folk art media representations and religious imagery He finds new meanings in the works of such creative giants as William Faulkner Richard Wright and Elvis Presley while at the same time closely examining little studied figures such as the artist revivalist McKendree Long Wilson proposes that southern spirituality is a neglected category of analysis in the recent flourishing of interdisciplinary studies on the South one that opens up the cultural interaction of blacks and whites in the region
