**Block Error-Correcting Codes** Sebastian Xambo-Descamps,2012-12-06 Error correcting codes have been incorporated in numerous working communication and memory systems This book covers the mathematical aspects of the theory of block error correcting codes together in mutual reinforcement with computational discussions implementations and examples of all relevant concepts functions and algorithms This combined approach facilitates the reading and understanding of the subject The digital companion of the book is a non printable pdf document with hyperlinks The examples included in the book can be run with just a mouse click and modified and saved by users for their own purpose

**Systems, Patterns and Data Engineering with Geometric Calculi** Sebastià Xambó-Descamps,2021-07-16 The intention of this collection agrees with the purposes of the homonymous mini symposium MS at ICIAM 2019 which were to overview the essentials of geometric calculus GC formalism to report on state of the art applications showcasing its advantages and to explore the bearing of GC in novel approaches to deep learning The first three contributions which correspond to lectures at the MS offer perspectives on recent advances in the application GC in the areas of robotics molecular geometry and medical imaging The next three especially invited hone the expressiveness of GC in orientation measurements under different metrics the treatment of contact elements and the investigation of efficient computational methodologies The last two which also correspond to lectures at the MS deal with two aspects of deep learning a presentation of a concrete quaternionic convolutional neural network layer for image classification that features contrast invariance and a general overview of automatic learning aimed at steering the development of neural networks whose units process elements of a suitable algebra such as a geometric algebra The book fits broadly speaking within the realm of mathematical engineering and consequently it is intended for a wide spectrum of research profiles In particular it should bring inspiration and guidance to those looking for materials and problems that bridge GC with applications of great current interest including the auspicious field of GC based deep neural networks
