Although articles in this volume fall into three thematic clusters each of those groups exemplifies three general themes micro social processes innovations and the question of continuity versus discontinuity and the relationship between ideas and practice Most of these essays touch upon and some of them are exclusively concerned with small scale social processes e g the routines of the all female early modern childbirth ritual the different ways that male practitioners were summoned to such occasions the functioning of voluntary hospitals the protocols underlying patient records Such social practices are well worth studying as both the sites and drivers of larger scale historical change Whenever there comes into being something new whether an institution a hospital a social practice the summoning of men as midwives or a concept a new approach to disease the question arises as to its relationship with what went before This concept resonates throughout these essays but is most to the fore in the chapters on early Hanoverian London which asks explanatory questions and on Porter versus Foucault who represent the extremes of continuity and discontinuity respectively A couple of generations ago the history of ideas was pursued largely without reference to practice in recent times the danger has appeared of the very reverse taking place This book ranges across a broad spectrum in this respect the emphasis being sometimes upon practice Eleanor Willughby s work as a midwife and sometimes upon ideas concepts of pleurisy across the centuries but in every case there is at least the potential for relating the two to one another None of these themes is specific to medical history on the contrary they are the bread and butter of historical reconstruction in general

Book Review Fred Albert Mettler,1948 **Publications of the Institute of the History of Medicine, the Johns Hopkins University** ,1956 *Race* Ivan Hannaford,1996 But he also finds the first traces of modern ideas of race and the protoscences of late medieval cabalism and hermeticism Following that trail forward he describes the establishment of modern scientific and philosophical notions of race in the nineteenth and twentieth centuries and shows how those notions became popular and pervasive even among those who claim to be nonracist
