Between Probability and Certainty Martin Smith,2017-11-17 Martin Smith explores a question central to philosophy namely what does it take for a belief to be justified or rational According to a widespread view whether one has justification for believing a proposition is determined by how probable that proposition is given one s evidence In the present book this view is rejected and replaced with another in order for one to have justification for believing a proposition one s evidence must normically support it roughly one s evidence must make the falsity of that proposition abnormal in the sense of calling for special independent explanation This conception of justification bears upon a range of topics in epistemology and beyond including the relation between justification and knowledge the force of statistical evidence the problem of scepticism the lottery and preface paradoxes the viability of multiple premise closure the internalist externalist debate the psychology of human reasoning and the relation between belief and degrees of belief Ultimately this way of looking at justification guides us to a new unfamiliar picture of how we should respond to our evidence and manage our own fallibility This picture is developed here [The Big Blue Bus](#) Tara Mooney,2010-10-06 The Big Blue Bus is a story to help anyone understand how to use public transport in the correct way a fun packed story for all children **Reports of the Public Service Commission of the State of Missouri** Missouri Public Service Commission,1930 [Bus Transportation](#) ,1922 *Discrete Choice Theory of Product Differentiation* Simon P.
