

# A story of natural love.

Two children, a boy and a girl, are shipwrecked on a lost tropical island. When their only adult friend dies, they must survive, somehow, alone.

Nature is kind to them. They live off the bounty of the jungle and the lagoon. The boy grows tall. The girl beautiful.

They swim naked over coral reefs. They run in a cathedral of trees. And the warm winds, the tropic moon, the silk sand conspire to enchant them.

When their love happens, it is as natural as the sea itself, and as powerful. Love as nature intended it to be.

How to speak of colors and odors In many cases we have to think about an adequate description of a perceived odor or shade  
of color Words are not fluently available The contributions discuss color and odor perception and its linguistic representation  
from different disciplinary angles from neurobiology neuropsychology psycholinguistics cognitive linguistics and philosophy  
They show that linguistic representation of colors and odors depends highly on cultures of communication Experts are skilled  
in discerning finer differences between their sense impressions and have at their disposal a special language which non  
experts do not master The color and odor vocabulary is rare if there is no cultural habit to communicate the very sense  
impression In cases where individuals have to speak of their sensory experiences more precisely they often turn to metaphors  
The contributions discuss the lack of inter individual conventions of naming and describing odors compared to the more  
expanded linguistic representation of colors **The Literary Digest** ,1928 **Motion Picture Herald** ,1926 **The**
