BLUE RIBBON OF THE AIR VILLARD HENRY SERRAN, 1987-12-17 **Balloon Ace** Charles D. Dusch Jr., 2025-02-04 In 1927 when aviator Charles A Lindbergh flew his famous monoplane in a triumphant tour of the United States the Spirit of St Louis touched down in Wheeling West Virginia for his visit to the Linsly School There Lindbergh laid a wreath at the foot of the Aviator a statue erected by Sallie Maxwell Bennett bearing the likeness of her son Louis Bennett Jr West Virginia s only First World War flying ace Though largely unknown today Bennett was an airpower innovator whose tragically short combat career would have an enduring impact on American flight and on war memorials both at home and abroad In **Balloon Ace** The Life of an Early Airpower Visionary historian Charles Dusch reconstructs Louis Bennett Jr s lost legacy Advocating for a national aviation reserve years before the writings of Billy Mitchell Bennett created a state aerial militia in 1917 complete with supporting airbases and an airplane factory When the US Army refused to accept his unit a frustrated Bennett joined the Royal Air Force to fight on the Western Front destroying nine German balloons and three aircraft in a matter of days before he himself was shot down In the second act of Bennett s story Dusch traces Sallie Bennett s quest to clandestinely recover her son s body Posing as a journalist Sallie traveled to Europe searching the cemeteries on the Western Front and later commissioned twelve memorials to Bennett including a chapel in France the RAF window in Westminster Abbey and the Aviator at Linsly Moved by the vast destruction of the continent she would eventually cross political boundaries to bring much needed publicity to other mothers demands for the US government to repatriate their own fallen loved ones From West Virginia to the Western Front and back again **Balloon Ace** is more than a multifaceted and insightful account of the pioneer aviators who prepared the United States for combat in the first air war it is also a

remarkable look at the commemoration culture that spanned the American Civil War to war torn Europe in the early twentieth century

The Birth of Military Aviation Hugh Driver, 1997 A survey of the development of British military aviation from 1903 to 1914 revealing the consequences of its annexation by the state as a branch of armaments as an underlying cause of aircraft inadequacies on the outbreak of war A mine of information drawing on an impressive range of archives It will become an important point of reference

ENGLISH HISTORICAL REVIEW This book aims to demonstrate how the crisis evident in British military aviation in the early years of the First World War was inherent in the entire development of aviation in the years preceding the conflict After outlining the work of the early pioneers and the growth of an aviation industry as a branch of armaments Dr Driver considers the objectives of the War Office in increasingly seeking to divert design development to their research establishment at Farnborough He shows how the resultant virtual state monopoly in design and procurement had disastrous consequences for aircraft innovation and development suffocating both competition and initiative and leading to the maintenance of inadequate aircraft by the Royal Flying Corps following the outbreak of war The continuing dispute and its culmination in the Fokker Scourge controversy of 1915 1916 graphically characterise the strained development of military industrial relations in this area Dr HUGH DRIVER gained an MA in War Studies from King's College London and a D Phil in modern history at Oriel College Oxford
