A Royal Blue Heritage:

The Palgrave Handbook of Blue Heritage Rosabelle Boswell, David O'Kane, Jeremy Hills, 2022-06-15 This handbook is unique in its consideration of social and cultural contributions to sustainable oceans management. It is also unique in its deconstruction of the hegemonic value attached to the oceans and in its analysis of discourses regarding what national governments in the Global South should prioritise in their oceans management strategy. Offering a historical perspective from the start, the handbook reflects on the confluence of western scientific discourse and colonialism and the impact of this on indigenous conceptions of the oceans and on social identity. With regard to the latter, the authors are mindful of the nationalisation of island territories worldwide and the impact of this process on regional collaboration, cultural exchange, and the valuation of the oceans. Focusing on global examples, the handbook offers a nuanced region-relevant contemporary conceptualisation of blue heritage, discussing what will be required to achieve an inclusive oceans economy by 2063, the end goal date of the African Union's Agenda 2063. The analysis will be useful to established academics in the field of ocean studies, policymakers, and practitioners engaged in research on the ocean economy, as well as graduate scholars in the ocean sciences.

A Royal Blue Heritage Don Wood, 1978-01-01 **Heritage in Eight Acts** Rodrigo Christofolletti, 2024-12-17
Heritage in Eight Acts brings together contributions on cultural heritage at an international level with an emphasis on Latin American and Ibero American studies, addressing points of convergence between the local and the global in an accessible and direct way. It discusses themes that have gained importance on the heritage preservation agenda, signaling how Latin America and Europe have expanded their connections and actions in favor of the multiplicity of heritage. Eight scholars from diverse backgrounds bring critical and nuanced understandings of heritage to the context of international relations. From architecture to history and from archeology to art history, each contribution displays methodological creativity and analytical depth. The result is a synthesis with the impact of showing how points of connection can bring Latin America closer to Europe, but not from a relationship of subalternity, but of shared protagonism.

A Maiden's Heritage Elizabeth Barbour Dickson, 1929 **Post-Conflict Archaeology and Cultural Heritage** Paul Newson, Ruth Young, 2017-11-14
The human cost in any conflict is of course the first care in terms of the reduction, if not the elimination, of damage. However, the destruction of archaeology and heritage as a consequence of civil and international wars is also of major concern, and the irreversible loss of monuments and sites through conflict has been increasingly discussed and documented in recent years. *Post-Conflict Archaeology and Cultural Heritage* draws together a series of papers from archaeological and heritage professionals seeking positive, pragmatic, and practical ways to deal with conflict-damaged sites. For instance, by showing that conflict-damaged cultural heritage and archaeological sites are a valuable resource rather than an inevitable casualty of war, and suggesting that archaeologists use their skills and knowledge to bring communities together, giving them ownership and identification with their cultural heritage. The book is a mixture of the discussion of problems, suggested planning,

solutions and case studies for both archaeologists and heritage managers It will be of interest to heritage professionals archaeologists and anyone working with post conflict communities as well as anthropology archaeology and heritage academics and their students at a range of levels

National Approaches to the Governance of Historical Heritage Over Time Stefan Fisch,2008 The five elements governmental authorities public discourse corporate and market interests citizens associations and international agencies may help in figuring out the complex and challenging purpose of the research work presented in this volume which is nothing less than the history of the governance of cultural and natural heritage in eleven countries from its outset to the present Speaking about governance is challenging The term has been vastly used and misused But today when the feverish popularity of the concept is probably in decline we rest with one solid conviction at least that social economic cultural and institutional processes are governed not only through government be it national or local with its legislative administrative and jurisdictional mechanisms but through a larger array of different actors and factors These include schools and universities citizens associations public opinion economic corporations non governmental organizations learned societies unions media international agencies clubs consultants etc In fact the reader is going to meet quite a few of these actors in this publication they are the unavoidable characters involved in the story the authors have set out to tell

International Law and the Protection of Cultural Heritage Craig Forrest,2012-08-06 The world s cultural heritage is under threat from war illicit trafficking social and economic upheaval unregulated excavation and neglect Over a period of almost fifty years the United Nations Educational Scientific and Cultural Organisation has adopted five international conventions that attempt to protect this cultural heritage This book comprehensively and critically considers these five UNESCO cultural heritage conventions The book looks at the conventions in the context of recent events that have exposed the dangers faced by cultural heritage including the destruction of cultural heritage sites in Iraq and the looting of the Baghdad museum the destruction the Buddhas of Bamiyan in Afghanistan the salvage of artefacts from the RMS Titanic and the illicit excavation and trade in Chinese Peruvian and Italian archaeological objects As the only existing work to consider all five of the cultural heritage conventions adopted by UNESCO the book acts as an introduction to this growing area of international law However the book does not merely describe the conventional principles and rules but critically evaluates the extent to which these international law principles and rules provide an effective and coherent international law framework for the protection of cultural heritage It is suitable not only for those schooled in the law but also for those who work with cultural heritage in all its manifestations seeking a broad but critical consideration of this important area of international law
