A Sense Of Wonder:

A Sense of Wonder Towards Nature Haydn Washington, 2018-08-06 Environmental scientist and writer Haydn Washington argues that we will not solve the environmental crisis unless we change our worldview and ethics and to do so we must rejuvenate our sense of wonder at nature This book focuses on humanity's relation with nature and the sense of wonder and belonging common to indigenous cultures and children everywhere Drawing on events in the author's own four decades working to protect wild places and the current literature on wonder it examines what a sense of wonder is what it has been called in different cultures and our high points of wonder at nature It also looks at the Great Divide in worldview between anthropocentrism and ecocentrism and considers the problem of anthropocentric theory in academia arguing that the focus should instead be on harmony with nature The book concludes with an examination of why wonder has become buried in Western society and considers ways in which it can be revived including rituals and education It also considers how wonder helps humanity to become whole The final chapter presents the road back to wonder and how wonder towards nature can be restored in Western society This book will be of great interest to environmental scientists conservation biologists environmental philosophers and ecological ethicists as well as environmentalists educators eco psychologists and students looking at sustainability deep ecology and environmental philosophy and ethics *The Sense of Wonder* Rachel

Carson, 2017-05-30 The award winning classic guide to introducing children to the marvels of nature from the acclaimed conservationist and author of *Silent Spring* In 1955 author Rachel Carson began work on an essay that she would come to consider one of her life's most important projects Her grandnephew Roger Christie had visited Carson that summer at her cottage in Maine and together they had wandered the surrounding woods and tide pools Teaching Roger about the natural wonders around them Carson began to see them anew herself and wanted to relate that same magical feeling to others who might hope to introduce a child to the beauty of nature If a child is to keep alive his inborn sense of wonder writes Carson he needs the companionship of at least one adult who can share it rediscovering with him the joy excitement and mystery of the world we live in *The Sense of Wonder* is a timeless volume that will be passed on from generation to generation as treasured as the memory of an early morning walk when the song of a whippoorwill was heard as if for the first time Featuring serene color photographs from renowned photographer Nick Kelsh this beautifully illustrated edition makes a fine gift for new and prospective mothers and fathers Gregory McNamee and helps us all to tap into the extraordinary power of the natural world
