Blue Hour:

Blue Hour Carolyn Forché, 2010-08-24 *Blue Hour* is an elusive book because it is ever in pursuit of what the German poet Novalis called the lost presence beyond appearance The longest poem *On Earth* is a transcription of mind passing from life into death in the form of an abecedary modeled on ancient gnostic hymns Other poems in the book especially *Nocturne* and *Blue Hour* are lyric recoveries of the act of remembering though the objects of memory seem to us vivid and irretrievable the rage to summon and cling at once fierce and distracted The voice we hear in *Blue Hour* is a voice both very young and very old It belongs to someone who has seen everything and who strives imperfectly desperately to be equal to what she has seen The hunger to know is matched here by a desire to be new totally without cynicism open to the shocks of experience as if perpetually for the first time though unillusioned wise beyond any possible taint of a false or assumed innocence Robert Boyers

The voice we hear in *Blue Hour* is a voice both very young and very old. It belongs to someone who has seen everything and who strives imperfectly desperately to be equal to what she has seen. The hunger to know is matched here by a desire to be new totally without cynicism, open to the shocks of experience as if perpetually for the first time though unillusioned, wise beyond any possible taint of a false or assumed innocence. This book is designed and written to give the applied statistician an insight into all these areas of investigation. **Urban Exploration**

Photography Todd Sipes, 2014 Urban exploration photography, sometimes called urbex, is a unique photographic genre that requires specific skills in order to produce compelling photographs. In *Urban Exploration Photography: A Guide to Creating and Editing Images of Abandoned Places*, photographer Todd Sipes walks students through everything they need to know about composing, shooting, and processing photos of abandoned man-made structures. Sipes begins with a focused discussion on preparation for this unique genre of photography, including what to bring, both photography-related and other such as clothes and accessories. Then he dives into the chapters on shooting, where he covers the role that composition plays in urban exploration photography, the three major shooting styles, or urban exploration photography general guidelines for camera settings and gear, why you should bracket your shots, and how to approach shooting in the dark, including light painting, using flashes and gels, and using an intervalometer. He also covers what kind of subject matter to shoot, including organic and synthetic elements present in the urban exploration environment, such as overgrowth, graffiti, paint, and machinery, as well as qualities of light to look for when shooting abandoned structures. In the second part of the book, Sipes tackles post-processing, including discussions of the various styles in urban exploration photography, as well as the actual post-processing techniques that take place in Lightroom and Photoshop, as well as third-party plug-ins. He also dedicates a section to Things to Avoid in post-processing, such as HDR fever, over-saturation, halos, and chromatic aberrations. **DSLR Photography Fundamentals**
