**Between Stillness and Motion** Eivind Røssaak, 2011 Since the development of film as an artistic medium in the 1890s there has been an inherent tension between still photographic images and moving cinematic images from their form and function to the messages they convey and their impact on the beholder and on culture at large This volume one of the first book length works to analyze critique and further the international debate about the meaning and use of motion and stillness in film and photography takes these concepts out of the theoretical arena of cinematic studies and applies them to the wider and ever changing landscape of images and media With contributions from such acclaimed international scholars as Tom Gunning Thomas Elsaesser Mark B N Hansen George Baker Ina Blom and Christa Bluminger these collected essays examine the strategic uses of stillness and motion in art from the mid nineteenth century to the technologically driven present

*The Literature of Exclusion* Andrew C. Wenaus, 2021-05-05 In the early twentieth century the Dadaists protested against art nationalism the individual subject and technologized war With their automatic anti art and cultural disruptiveness Dadaists sought to signify no thing Today data also operates autonomously However rather than dismantling tradition data organizes selects combines quantifies and simplifies the complexity of actuality Like Dada data also signifies nothing While Dadaists protest with purpose data proceeds without intention The individual in the early twentieth century agonizes over the alienation from daily life and the fear of being converted into a cog in a machine Today however the individual in twenty first century supermodernity merges not with large industrial machinery but with the processual and procedural logic of programming with innocuous ease Both exclude human agency from self narration but to differing degrees of abstraction Examining the work of B R Yeager Samuel Beckett Jeff Noon Kenji Siratori Mike Bonsall Allison Parrish and narratives written by artificial intelligence Wenaus considers the threshold of sensible narration and the effects that the shift from a culture of language to a culture of digital code has on lived experience While data offers a closed system Dadaist literature of exclusion he suggests promises a future of open hyper contingent unprescribed alternatives for self narration
