Heard,2020-03-17 An engaging history of the surprising poignant and occasionally scandalous stories behind scientific names and their cultural significance Ever since Carl Linnaeus s binomial system of scientific names was adopted in the eighteenth century scientists have been eponymously naming organisms in ways that both honor and vilify their namesakes This charming informative and accessible history examines the fascinating stories behind taxonomic nomenclature from Linnaeus himself naming a small and unpleasant weed after a rival botanist to the recent influx of scientific names based on pop culture icons including David Bowie s spider Frank Zappa s jellyfish and Beyonc s fly Exploring the naming process as an opportunity for scientists to express themselves in creative ways Stephen B Heard s fresh approach shows how scientific names function as a window into both the passions and foibles of the scientific community and as a more general indicator of the ways in which humans relate to and impose order on the natural world
