Anglo Norman Medicine Volume 2 Shorter Treat:

Wounds in the Middle Ages Anne Kirkham, Cordelia Warr, 2016-02-11 Wounds were a potent signifier reaching across all aspects of life in Europe in the middle ages and their representation perception and treatment is the focus of this volume Following a survey of the history of medical wound treatment in the middle ages paired chapters explore key themes situating wounds within the context of religious belief writing on medicine status and identity and surgical practice The final chapter reviews the history of medieval wounding through the modern imagination Adopting an innovative approach to the subject this book will appeal to all those interested in how past societies regarded health disease and healing and will improve knowledge of not only the practice of medicine in the past but also of the ethical religious and cultural dimensions structuring that practice

Saints, Cure-seekers and Miraculous Healing in Twelfth-century England Ruth J. Salter, 2021 The cults of the saints were central to the medieval Church These holy men and women acted as patrons and protectors to the religious communities who housed their relics and to the devotees who requested their assistance in petitioning God for a miracle Among the collections of posthumous miracle stories miracula accounts of holy healing feature prominently and depict cure seekers successfully securing their desired remedy for a range of ailments and afflictions What can these miracle accounts tell us of the cure seekers experiences of their journey from ill health to recovery and how was healthcare presented in these sources This book undertakes an in depth study of the miraculous cure seeking process through the lens of Latin miracle accounts produced in twelfth century England a time both when saints cults particularly flourished and there was an increasing transmission and dissemination of classical and Arabic medical works Focused on shorter miracula with a predominantly localised focus and thus on a select group of cure seekers it brings together studies of healthcare and pilgrimage to look at an alternative to medical intervention and the practicalities and processes of securing saintly assistance

The Sense of Smell in the Middle Ages Katelynn Robinson, 2019-09-09 Odors including those of incense spices cooking and refuse were both ubiquitous and meaningful in central and late medieval Western Europe The significance of the sense of smell is evident in scholastic Latin texts most of which are untranslated and unedited by modern scholars Between the late eleventh and thirteenth century medieval scholars developed a logical theory of the workings of the sense of smell based on Greek and Arabic learning In the thirteenth through fifteenth century medical authors detailed practical applications of smell theory and these were communicated to individuals and governing authorities by the medical profession in the interests of personal and public health At the same time religious authors read philosophical and medical texts and gave their information religious meaning This reinterpretation of scholastic philosophy and medicine led to the development of what can be termed a medically aware theology of smell that was communicated to popular audiences alongside traditional olfactory theory in sermons Its impact on popular thought is reflected in late medieval mystical texts While the senses have received increasing scholarly attention in recent decades this volume presents the first detailed research into the sense of smell in the

later European Middle Ages **Handbook of Medieval Studies** Albrecht Classen,2010-11-29 This interdisciplinary handbook provides extensive information about research in medieval studies and its most important results over the last decades The handbook is a reference work which enables the readers to quickly and purposely gain insight into the important research discussions and to inform themselves about the current status of research in the field The handbook consists of four parts The first large section offers articles on all of the main disciplines and discussions of the field The second section presents articles on the key concepts of modern medieval studies and the debates therein The third section is a lexicon of the most important text genres of the Middle Ages The fourth section provides an international bio bibliographical lexicon of the most prominent medievalists in all disciplines A comprehensive bibliography rounds off the compendium The result is a reference work which exhaustively documents the current status of research in medieval studies and brings the disciplines and experts of the field together **Queen of Sheba's Gift** Marcus Milwright,2021-03-02 The balsam of Matarea was a substance famous as a panacea among physicians in the Middle East and Europe during the Antique and Medieval periods It was used in many aspects of medieval life and is associated with figures such as the Virgin Mary Jesus Christ King Solomon the Queen of Sheba and Cleopatra The story of this substance takes the reader into the political life of the medieval Mediterranean and Middle East and back into the ancient history of Palestine Using written sources visual data and archaeological material Marcus Milwright reconstructs the fascinating cultural history of the balsam tree from Jericho and En Gedi to Egypt and from ancient times to the 17th century Miwright addresses the symbolic associations of balsam and the site of Matarea where the last balsam tree died in 1615 the distribution of products from the tree through trade and diplomacy and the applications balsam products in medicine ritual and the domestic environment **The British National Bibliography** Arthur James Wells,2002 Pharmacy in History ,1994 **The Bookseller** ,1895 **Bookseller and the Stationery Trades' Journal** ,1895 **The Knowing of Woman's Kind in Childing** Alexandra Barratt,2001 This study comprises a critical edition using all the five extant MSS of the most popular of the Middle English gynaecological texts deriving from the Latin Trotula text The Knowing of Women s Kind in Childing is a short fifteenth century prose treatise which claims to be translated from Latin texts or Latin and French according to some manuscripts that derive ultimately from the Greek It has a unique importance as it was written by a woman for a female audience and on the subject of women The text considers women s physical constitution what makes them different from men primarily the possession of a womb and in particular the three types of problem that the womb causes That it was written for a female audience is made explicit in the Prologue where the writer explains that he has translated this text out of French and Latin into English because literate women are more likely to read English than any other language and can then pass on the information it contains to illiterate women More controversial must be the claim that this text was written by a woman The text is a translation no doubt by a man but one of his ultimate sources was a text attributed to Trotula in the Middle Ages believed to be the name of a midwife

or gynaecologist from Salerno who wrote extensively on women's ailments, childbirth and beauty care. Recent work shows that such a woman probably named Trota did exist and that she did write a gynaecological treatise the Trotula or little Trota which became closely associated with two other texts not by her. All three however became very popular and were widely disseminated under her name. Large sections of *The Knowing of Woman's Kind* come via an Old French translation from a version of the *Liber de Sinthomatibus Mulierum* the *Cum auctor* the first element in this Trotula ensemble. [Routledge Revivals: Medieval England \(1998\)](#) Paul E. Szarmach, M. Teresa Tavormina, Joel T. Rosenthal, 2017-07-05. First published in 1998, this valuable reference work offers concise expert answers to questions on all aspects of life and culture in Medieval England including art, architecture, law, literature, kings, women, music, commerce, technology, warfare and religion. This wide-ranging text encompasses English social, cultural and political life from the Anglo-Saxon invasions in the fifth century to the turn of the sixteenth century, as well as its ties to the Celtic world of Wales, Scotland and Ireland, the French and Anglo-Norman world of the Continent and the Viking and Scandinavian world of the North Sea. A range of topics are discussed from Sedulius to Skelton, from Wulfstan of York to Reginald Pecock, from Pictish art to Gothic sculpture and from the Vikings to the Black Death. A subject and name index makes it easy to locate information and bibliographies direct users to essential primary and secondary sources as well as key scholarship. With more than 700 entries by over 300 international scholars, this work provides a detailed portrait of the English Middle Ages and will be of great value to students and scholars studying Medieval history in England and Europe as well as non-specialist readers.
