Animal Care:

Animal Welfare Richard P. Haynes, 2008-07-27 Members of the animal welfare science community which includes both scientists and philosophers have illegitimately appropriated the concept of animal welfare by claiming to have given a scientific account of it that is more objectively valid than the more sentimental account given by animal liberationists This strategy has been used to argue for merely limited reform in the use of animals This strategy was initially employed as a way of sympathetically responding to the abolitionist claims of anti vivisectionists who objected to the use of animals in research It was subsequently used by farm animal scientists The primarily reformist as opposed to abolitionist goals of this community make the false assumption that there are conditions under which animals may be raised and slaughtered for food or used as models in scientific research that are ethically acceptable The tendency of the animal welfare science community is to accept this assumption as their framework of inquiry and thus to discount certain practices as harmful to the interests of the animals that they affect For example animal welfare is conceptualized in such a way that death does not count as harmful to the interests of animal nor prolonged life a benefit Practical Management of Research Animal Care and Use Programs Javier Guillén, Viola Galligioni, 2024-11-06 This book provides a complete guide to all the aspects to consider during planning establishing and managing ethically and efficiently research animal care and use programs taking into account all stakeholders involved in the process Practical information on how to address the general and particular needs of all animal care and use program areas is provided Consequently the reader is supported with getting their project ethically and legally compliant and implemented efficiently with organizing safe and appropriate facilities and equipment as well as hiring sufficiently trained personnel Furthermore strategies for impactful internal and external communication are outlined Responsible use of animals in research can be nothing but teamwork The environment and professional experience of all involved stakeholders are the key for ensuring quality science as well as animal and personnel welfare Research animal care and use programs represent a complex system in which animals legislation and good practices facility personnel and researchers interact on a daily basis Thoughtful planning from the first step ensures animal welfare and improves the quality of in vivo experimentation This book addresses animal program managers veterinarians researchers and technicians working in research animal facilities Chapter 18 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com) Animal Welfare Information Center Newsletter, 1997 Animal Rites Andrew Linzey, 2015-06-23 Christians believe that the logos is the source of all life yet Christian worship remains unashamedly human centric The world of creation and animals in particular is almost invisible in our worship The churches do not have the liturgical means of celebrating the life of animals giving thanks for their companionship praying for the relief of their suffering or marking their death This unique book provides a variety of liturgies that are animal friendly and animal inclusive They include services in celebration of animal companionship services for animal welfare healing liturgies new eucharistic

prayers for the whole creation and animal burial services Underlying all these new forms is a serious theological purpose to help us to draw deeper into the mystery of God s work in creation and to affirm other sentient beings as co creatures with us

The Care and Feeding of an IACUC Whitney Kayla Petrie, M. Lawrence Podolsky, Sonja Lea Wallace, Victor Lukas, 1999-03-25 The framers of the 1985 amendments to the Federal Animal Welfare Act AWA envisioned the Institutional Animal Care and Use Committee IACUC as the linchpin the central and cohesive element of the laboratory animal care and use program at research education and testing organizations Effective operation of this committee is essential if these organizations are to achieve full regulatory compliance and more importantly retain the public's support for activities involving the use of animal subjects In 1987 the Scientists Center for Animal Welfare in cooperation with the American Association for Laboratory Animal Science published a compilation of presentations made at five regional workshops on effective operation of IACUCs In the decade since this compilation was published nearly all of the 18 consensus recommendations developed by the workshop participants and the Center's Board of Trustees have either been incorporated into the AWA regulations or have been voluntarily adopted by institutions using animals subjects *The Care and Feeding of an IACUC The Organization and Management of an Institutional Animal Care and Use Committee* superbly illustrates the progress and advances the animal using communities have made in implementing these and other improvements in their animal care and use programs The highly qualified contributors provide twelve information packed chapters and ten appendices that provide IACUC chairs and members with an indispensable reference This book summarizes information critical to the effective and efficient management and operation of an IACUC and as such should be made available to IACUC members and administrative officials in every institution using laboratory animals "Code of Massachusetts regulations, 2014", 2014 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 Animal Care and Management at the National Zoo National Research Council, Division on Earth and Life Studies, Institute for Laboratory Animal Research, Board on Agriculture and Natural Resources, Committee on the Review of the Smithsonian Institution's National Zoological Park, 2005-11-27 This report follows up on an interim report released in February 2004 that focused on immediate needs in the areas of animal care and management recordkeeping and pest control The report finds that the zoo has made good faith efforts to correct deficiencies noted in the

interim report and has made some noticeable improvements in the past year in zoo operations and animal care. However, problems in areas such as staff training, workplace culture, and strategic planning still need to be addressed. Specifically, the report recommends that the zoo immediately develop and implement animal care training programs to ensure that people who are directly responsible for the well-being of its animal collection are adequately prepared and competent. The report commends a zoo-initiated strategic planning process as a positive step but recommends it contain a more detailed comprehensive strategy of how it will meet short-term goals and that it should link plans to upgrade facilities with those to acquire animals. The zoo should also focus on improving communication among keepers, veterinarians, nutritionists, senior managers, and curators.
