## **Animal Culling:**

**The end of animal life: a start for ethical debate** Franck L.B. Meijboom, Elsbeth N. Stassen, 2023-08-07 Killing animals is common practice yet it is not morally neutral. The end of animal life is related to many societal and ethical questions and concerns. Questions such as how long should we continue to treat an animal before putting it down. But also the question whether it could be legitimate to kill individual animals for the welfare of the herd or of future generations. The ongoing public and academic discussions on these and on other well known questions like those related to the killing of animals for food or for scientific purposes show that there is no one standard evaluation of animal life. This book is an edited volume that enables the reader to get a grip on that plurality of views with regard to animals. It helps to deal with the many questions related to the end of animal life. The chapters show how the plurality of views on killing animals is related to moral presuppositions by providing a clear overview of the ethical views on end of life decisions. Furthermore the book contains a number of applied studies of the ethical questions related to killing animals in various practices including small animal practice, wildlife management, fishing and fish farming, animal experimentation and livestock farming. These chapters can help veterinarians, scientists, students, policy makers and many other professionals working with animals to easily get a good overview of the issues at stake and may contribute to responsible decision making with regard to the end of animal life.

**The Encyclopedia of Applied Animal Behaviour and Welfare** D. S. Mills, Jeremy N. Marchant-Forde, 2010 The practical focus of this authoritative comprehensive encyclopedia promotes the understanding and improvement of animals' behaviour without compromising welfare. It will be an essential resource for practising veterinarians, researchers and students in zoology and ethology and for all those working with and interested in animals and their welfare. *The Slaughter of Farmed Animals* Temple Grandin, Michael Cockram, 2020-06-03 This book provides both evidence based scientific studies and practical guidance to enhance the welfare of cattle, pigs, sheep and poultry at slaughter. Temple Grandin and Michael Cockram have brought together a range of international experts to prepare chapters on philosophical and ethical views on the slaughter of farmed animals. These include welfare issues and their assessment, the condition of animals on arrival and their management during lairage, animal handling methods of humane slaughter and assessment of unconsciousness. The book boldly tackles controversial issues around the compromises necessary when balancing animal welfare concerns with commercial realities as well as religious slaughter. Chapters cover methods of stunning, pre slaughter handling, equipment design, monitoring welfare with abattoir data and auditing methods. It is an important publication for those involved in implementing improvements in the humane slaughter of farmed animals and is recommended for veterinarians, students, abattoir managers and government regulators.

Instant Insights: Ensuring animal welfare during transport and slaughter Prof Jan Shearer, Carmen Gallo, Ana Strappini, Dr Luigi Faucitano, Dr Antonio Velarde, Dr Dorothy McKeegan, Dr Jessica Martin, Prof. Paul H. Hemsworth, E. C. Jongman, 2021-11-16 This collection features five peer reviewed

literature reviews on ensuring animal welfare during transport and slaughter The first chapter examines the impact of transport on beef and dairy cattle as well as the effects of transport on carcass quality issues such as bruising and dark cutting beef It details how conditions can be optimised to ensure the welfare needs of the animal are met during all stages of transport The second chapter reviews the legislation and codes of practice surrounding the transport and slaughter of cows to be culled as a result of disease or the development of health conditions such as lameness The third chapter considers the effects of transport handling and slaughter practices on pigs as well as physiological effects on carcass and meat quality The fourth chapter explores current approaches used to stun poultry before slaughter including electrical stunning and controlled atmosphere stunning The chapter reviews the associated risks and benefits of each approach to overall bird health and welfare The final chapter reviews the main welfare issues associated with management of sheep once they leave the farm including transport by road and sea use of holding facilities as well as handling and stunning of sheep at abattoirs

Understanding Emerging Epidemics Ananya Mukherjea, 2010-02-25 Focuses on the contributions that social scientists can make to understanding emerging epidemics their impact the threats they pose and their social and political contexts This book examines emerging epidemics and offers a theoretical analysis of the use of epidemics and epidemiology as frameworks for understanding these phenomena Report of the Director of Veterinary Services and Animal Industry South Africa.
