Animal Health Products:

Long Acting Animal Health Drug Products Michael J. Rathbone, Arlene McDowell, 2012-10-12 Long acting veterinary formulations play a significant role in animal health production and reproduction within the animal health industry. Such technologies offer beneficial advantages to the veterinarian, farmer, and pet owner. These advantages have resulted in them growing in popularity in recent years. The pharmaceutical scientist is faced with many challenges when innovating new products in this demanding field of controlled release. This book provides the reader with a comprehensive guide on the theories, applications, and challenges associated with the design and development of long acting veterinary formulations. The authoritative chapters of the book are written by some of the leading experts in the field. The book covers a wide scope of areas including the market influences, preformulation, biopharmaceutics, in vitro drug release testing, and specification setting to name but a few. It also provides a detailed overview of the major technological advances made in this area. As a result, this book covers everything a formulation scientist in industry or academia or a student needs to know about this unique drug delivery field to advance health production and reproduction treatment options and benefits for animals worldwide. FAO Global Conference on Animal Health Innovation, Reference Centres and Vaccines, This volume presents the proceedings of the FAO Global Conference on Animal Health Innovation, Reference Centres and Vaccines held at FAO headquarters in Rome from 23 to 25 September 2024. The event gathered over 400 participants including delegates from 66 FAO Members, chief veterinary officers, international organizations, FAO reference centres, vaccine manufacturers, researchers, and young professionals. The goal was to address urgent animal health challenges and shape a path towards sustainable transformation. Organized into nine thematic sessions, the proceedings explore innovations in veterinary vaccinology and diagnostics, the evolving role of reference centres and regional labs, the One Health approach, and strategies to enhance preparedness, surveillance, and collaboration. It includes summaries of high level plenaries, panel discussions, ministerial sessions, six side events, and a curated exhibition of twelve global success stories in sustainable livestock practices. The publication offers an accessible and comprehensive record of the conference featuring keynote speeches, country interventions, technical presentations, and expert insights. It serves as a key reference for decision makers, practitioners, academics, and development partners working to strengthen animal health systems. As both a technical guide and strategic roadmap, the volume underscores FAO's commitment to global cooperation in animal health. It supports the development of inclusive, resilient, and sustainable livestock systems that advance food security, rural development, and One Health objectives worldwide, aligned with FAO's vision for better production, better nutrition, a better environment, and a better life. **Development and Formulation of Veterinary Dosage Forms** Gregory E. Hardee, J. Desmond Baggo, 2021-04-30 Although the United States, U.S., and the more developed nations of the remainder of the world are blessed with a variety of pharmaceuticals, feed additives, and biological products to treat, prevent, and control animal diseases, there is a healthy desire among persons involved in

animal health issues to increase our animal medicine chest The interest stems from the desire to efficiently produce food that is safe and plentiful and from the desire to have more and better government approved products available for the prevention and treatment of diseases of dogs cats and horses and for an increasing variety of minor animal species For the animal health industry increased drug availability means broader markets increased revenues and an opportunity to better serve their customers For the veterinarian more animal health products means that he or she is better able to treat the usual and the unusual conditions and to prevent animal disease and suffering No doubt we are all winners when new technology and industrial and regulatory initiatives hasten the availability of safe and effective animal health products

Hearing to Review the Advances of Animal Health Within the Livestock Industry United States. Congress. House. Committee on Agriculture. Subcommittee on Livestock, Dairy, and Poultry (2007-2012),2009

Coccidiosis in Livestock, Poultry, Companion Animals, and Humans J. P. Dubey,2019-11-27 Coccidiosis is one of the most important diseases of livestock particularly poultry with billions of dollars spent on prevention worldwide The disease is so important and pervasive that until recently all poultry feed was medicated with coccidiostats mainly antibiotics With the rapid development of drug resistance the search is on for alternative methods of control of coccidiosis in poultry With chapters authored by internationally renowned scientists this book covers coccidiosis in all major livestock species including cattle sheep and goats Special emphasis is given to poultry coccidiosis given the significant economic impact and another chapter looks at intestinal coccidiosis in humans including Cyclospora Chapters discuss techniques molecular biology host pathogen immunobiology and immunoprophylaxis genetics and genomics biology and chemotherapy Despite an explosion of research in the last 40 years there has been no new book published discussing conventional coccidiosis for more than 25 years This comprehensive review therefore answers an urgent need for a book dealing exclusively with conventional coccidia Cystoisospora Cyclospora It provides concise authoritative up to date information on coccidiosis with particular attention given to research in the last 28 years This book is essential reading for any practitioner or researcher involved in livestock production including biologists veterinarians parasitologists and researchers from government academia and industry World Animal Health ,1987
