Great? Stephen Hetherington, 2017-11-10 This book is inspired by a single powerful question What is it to be great as a philosopher No single grand answer is presumed to be possible instead rewardingly close studies of philosophical greatness are developed This is a scholarly yet accessible volume blending metaphilosophy with the long history of philosophy and traversing centuries and continents The result is a series of case studies by accomplished scholars each chapter trying to understand and convey a particular philosopher s greatness Lloyd P Gerson on Plato Karyn Lai on Zhuangzi David Bronstein on Aristotle Jonardon Ganeri on Buddhaghosa Jeffrey Hause on Aquinas Gary Hatfield on Descartes Karen Detlefsen on du Chatelet Don Garrett on Hume Allen Wood on Kant as a moral philosopher Nicholas F Stang on Kant as a metaphysician Ken Gemes on Nietzsche Cheryl Misak on Peirce David Macarthur on Wittgenstein This also serves a larger philosophical purpose

Might we gain increased clarity about what philosophy is in the first place After all in practice we individuate philosophy partly through its greatest practitioners greatest contributions The book does not discuss every philosopher who has been regarded as great The point is not to offer a definitive list of The Great Philosophers but rather to learn something about what great philosophy is and might be from illuminated examples of past greatness When a Human Gives Birth to a Raven Rafael Rachel Neis,2023-06-14 This book investigates rabbinic treatises relating to animals humans and other lifeforms Through an original analysis of creaturely generation and species classification by late ancient Palestinian rabbis and other thinkers in the Roman empire Rafael Rachel Neis shows how rabbis blurred the lines between the human and other beings This they did even as they were intent on classifying creatures and delineating the contours of the human Recognizing that life proliferates via multiple mechanisms beyond sexual copulation between two heterosexual male and female individuals of the same species the rabbis produced intricate alternatives This expansive view of generation included humans Likewise in parsing the variety of creatures the rabbis attended to the overlaps and resemblances across seemingly distinct species upsetting in turn unmitigated claims of human distinctiveness Intervening in conversations in animal studies queer theory trans theory and feminist science studies When a Human Gives Birth to a Raven provincializes sacrosanct ideals of reproduction in favor of a broader range of generation kinship and species offering powerful historical alternatives to the paradigms associated with so called traditional ideas **Annual Report** Pennsylvania.
