Animal Rights Human Rights Entanglements Of Oppression And Liberation:

Animal Rights/Human Rights David Nibert,2002-05-28 This accessible and cutting edge work offers a new look at the history of western civilization one that brings into focus the interrelated suffering of oppressed humans and other animals Nibert argues persuasively that throughout history the exploitation of other animals has gone hand in hand with the oppression of women people of color and other oppressed groups He maintains that the oppression both of humans and of other species of animals is inextricably tangled within the structure of social arrangements Nibert asserts that human use and mistreatment of other animals are not natural and do little to further the human condition Nibert s analysis emphasizes the economic and elite driven character of prejudice discrimination and institutionalized repression of humans and other animals His examination of the economic entanglements of the oppression of human and other animals is supplemented with an analysis of ideological forces and the use of state power in this sociological expose of the grotesque uses of the oppressed past and present Nibert suggests that the liberation of devalued groups of humans is unlikely in a world that uses other animals as fodder for the continual growth and expansion of transnational corporations and conversely that animal liberation cannot take place when humans continue to be exploited and oppressed

Animal Oppression and Human Violence David A. Nibert,2013-05-07 Jared Diamond and other leading scholars have argued that the domestication of animals for food labor and tools of war has advanced the development of human society But by comparing practices of animal exploitation for food and resources in different societies over time David A Nibert reaches a strikingly different conclusion He finds in the domestication of animals which he renames domesecration a perversion of human ethics the development of large scale acts of violence disastrous patterns of destruction and growth curbing epidemics of infectious disease Nibert centers his study on nomadic pastoralism and the

development of commercial ranching a practice that has been largely controlled by elite groups and expanded with the rise of capitalism Beginning with the pastoral societies of the Eurasian steppe and continuing through to the exportation of Western meat centered eating habits throughout today s world Nibert connects the domestication of animals to violence invasion extermination displacement enslavement repression pandemic chronic disease and hunger In his view conquest and subjugation were the results of the need to appropriate land and water to maintain large groups of animals and the gross amassing of military power has its roots in the economic benefits of the exploitation exchange and sale of animals Deadly zoonotic diseases Nibert shows have accompanied violent developments throughout history laying waste to whole cities societies and civilizations His most powerful insight situates the domestication of animals as a precondition for the oppression of human populations particularly indigenous peoples an injustice impossible to rectify while the material interests of the elite are inextricably linked to the exploitation of animals Nibert links domestication to some of the most critical issues facing the world today including the depletion of fresh water topsoil and oil reserves global warming and world hunger and he reviews the U S government s military response to the inevitable crises of an overheated hungry resource depleted world Most animal advocacy campaigns reinforce current oppressive practices Nibert argues Instead he suggests reforms that challenge the legitimacy of both domestication and capitalism

Animal Advocacy and Environmentalism

Amy J. Fitzgerald,2018-12-14 Many people consider themselves to be both environmentalists and supporters of animal welfare and rights Yet despite the many issues which bring environmentalists and animal advocates together for decades there have been flashpoints which seem to pit these two social movements against each other dividing them in ways unhelpful to both In this innovative book Amy J Fitzgerald analyses historic philosophical and socio cultural reasons for this divide Tackling three core contentious issues sport hunting zoos and fur over which there has been profound disagreement between segments of these movements she demonstrates that even here they are not as far apart as is generally assumed and that there is space where they could more productively work together Charting a path forwards she points to evolving practices and broad structural forces which are likely to draw the movements closer together in the future The threats posed by industrial animal agriculture to the environment and to non human and human animals demand once and for all that we bridge the divide between animal advocacy and environmentalism
