Arming Against Hitler France And The Limits Of Military Planning:

Arming Against Hitler Eugenia C. Kiesling, 1996 In May June 1940 the Germans demolished the French Army inflicting more than 300 000 French casualties including more than 120 000 dead While many historians have focused on Frances failure to avoid this catastrophe Eugenia Kiesling is the first to show why the French had good reason to trust that their prewar defense policies military doctrine and combat forces would preserve the nation France and the Nazi Menace Peter Jackson, 2000-10-26 *France and the Nazi Menace* examines the French response to the challenge posed by National Socialist Germany in the years 1933 1939 It focuses on the relationship between the intelligence on German intentions and capabilities and the evolution of French national policy from the rise of Hitler in 1933 to the outbreak of the Second World War in 1939 Based on extensive archival research it considers the nature of the intelligence process and the place of intelligence within the French policy making establishment during the inter war period The central argument in the book is that the German threat was far from the only challenge facing French national leaders in an era of economic depression and profound ideological discord Only after the national humiliation at the Munich Conference did the threat from Nazi Germany take precedence over France s internal problems in the making of policy Waging War Wayne E. Lee, 2016 *Waging War* Conflict Culture and Innovation in World History provides a wide ranging examination of war in human history from the beginning of the species until the current rise of the so called Islamic State Although it covers many societies throughout time the book does not attempt to tell all stories from all places nor does it try to narrate important conflicts Instead author Wayne E Lee describes the emergence of military innovations and systems examining how they were created and then how they moved or affected other societies These innovations are central to most historical narratives including the development of social complexity the rise of the state the role of the steppe horseman the spread of gunpowder the rise of the west the bureaucratization of military institutions the industrial revolution and the rise of firepower strategic bombing and nuclear weapons and the creation of people s war Professional Journal of the United States Army , 1998 Quarterly Review of Military Literature , 1998 *Inside Hitler's High Command* Geoffrey P. Megargee, 2000 Challenging previous accounts Megargee shatters the myth that German generals would have prevailed in World War II if only Hitler had not meddled in their affairs Instead he observes that the military s strategic ideas were no better than Hitler s and often were worse 20 photos **The German Way of War** Robert Michael Citino, 2005 For Frederick the Great the prescription for warfare was simple kurz und vives short and lively wars that relied upon swift powerful and decisive military operations Robert Citino takes us on a dramatic march through Prussian and German military history to show how that primal theme played out time and time again Citino focuses on operational warfare to demonstrate continuity in German military campaigns from the time of Elector Frederick Wilhelm and his great sleigh drive against the Swedes to the age of Adolf Hitler and the blitzkrieg to the gates of Moscow Along the way he underscores the role played by the Prussian army in elevating a small vulnerable state to

the ranks of the European powers describes how nineteenth century victories over Austria and France made the German army the most respected in Europe and reviews the lessons learned from the trenches of World War I

Airpower over the Rhine James F. Slaughter, 2025-04-08 Airpower over the Rhine is a critical new perspective on the air battle between the French Air Force FAF and the Luftwaffe in the skies over France during May and June 1940 Why were the French overpowered in the air What factors led to their defeat Author James F Slaughter III examines how each country s leadership created the circumstances that enabled the Luftwaffe s victory over the FAF and Germany s ultimate defeat of France Conventional wisdom especially in the English speaking world purports that the FAF was a nonentity whose loss was all but guaranteed But the FAF did in fact show up to fight With virtually every disadvantage and under impossible conditions FAF pilots nevertheless managed to land significant blows against the Luftwaffe far more than they are given credit for today Slaughter traces this misconception to a largely collaborationist cover up beginning with the Rion Trials in Vichy France that was then perpetuated by Cold War politics and popular mythology Rather than absence or incompetence the FAF lost due to a series of complex internal conflicts within French leadership both political and military that set them up to fail This work compares and examines six fundamental areas that affected the development of the FAF and the Luftwaffe aircraft and equipment the aircraft industries intelligence the experiences of the Spanish Civil War doctrine and training and politics and air power It also offers new details about and insights into Pierre Cot a controversial French politician largely unknown outside France Airpower over the Rhine explains Cot s internal and external impact on the development of the French Air Force and details what is known about his apparent efforts to spy for the Soviet Union Thoroughly researched and compellingly written this book will appeal to anyone with an interest in World War II

Quest for Decisive Victory Robert Michael Citino, 2002 Since the earliest days of warfare military operations have followed a predictable formula after a decisive battle an army must pursue the enemy and destroy its organization in order to achieve a victorious campaign But by the mid 19th century the emergence of massive armies and advanced weaponry and the concomitant decline in the effectiveness of cavalry had diminished the practicality of pursuit producing campaigns that bogged down short of decisive victory Great battles had become curiously indecisive decisive campaigns virtually impossible Military Review ,1998

The Cold War U.S. Army Ingo Trauschweizer, 2008 Focuses on the Seventh Army in West Germany the largest and best prepared field army ever deployed by the U S in peacetime to show how the U S army redefined its identity structure and mission in order to avoid obsolescence during the Cold War era of nuclear weapons and air power The Journal of Military History ,2007

The American Revolution in Military Affairs Colin S. Gray, 1997 Blitzkrieg to Desert Storm Robert Michael Citino, 2004 When Germany launched its blitzkrieg invasion of France in 1940 it forever changed the way the world waged war Although the Wehrmacht ultimately succumbed to superior Allied firepower in a two front war its stunning operational achievement left a lasting impression on military commanders throughout the world even if their own operations

were rarely executed as effectively Robert Citino analyzes military campaigns from the second half of the twentieth century to further demonstrate the difficulty of achieving decisive results at the operational level Offering detailed operational analyses of actual campaigns Citino describes how UN forces in Korea enjoyed technological and air superiority but found the enemy unbeatable provides analyses of Israeli operational victories in successive wars until the Arab states finally grasped the realities of operational level warfare in 1973 and tells how the Vietnam debacle continued to shape U S doctrine in surprising ways Looking beyond major power conflicts he also reveals the lessons of India s blitzkrieg like drive into Pakistan in 1971 and of the senseless bloodletting of the Iran Iraq War Citino especially considers the evolution of U S doctrine and assesses the success of Desert Storm in dismantling an entrenched defending force with virtually no friendly casualties He also provides one of the first scholarly analyses of Operation Iraqi Freedom showing that its plan was curiously divorced from the realities of military history grounded instead on nebulous theories about expected enemy behavior Throughout Citino points to the importance of mobility especially mobilized armor in modern operational warfare and assesses the respective roles of firepower training doctrine and command and control mechanisms Brimming with new insights Citino s study shows why technical superiority is no guarantee of victory and why a thorough grounding in the history of past campaigns is essential to anyone who wishes to understand modern warfare Blitzkrieg to Desert Storm provides that grounding as it addresses the future of operational level warfare in the post 9 11 era

Toward a Strategy of Positive Ends Huba Wass de Czege,Antulio Joseph Echevarria,Army War College (U.S.). Strategic Studies Institute,2001 Brigadier General Retired Huba Wass de Czege and Lieutenant Colonel Antulio J Echevarria II make a case for a strategy aimed at achieving positive rather than neutral or negative ends They first discuss the dynamic conditions of the new strategic environment then explore the options the United States has available for dealing with those conditions The options include 1 preventive defense 2 neo isolationism and 3 a strategy that pursues positive ends Only the last the authors argue deals with the new security environment in a proactive way It enables the United States to define its vital interests in terms of conditions such as peace freedom rule of law and economic prosperity rather than as the containment or defeat of inimical state or nonstate actors The basic approach of a strategy of positive ends would be to build and enlarge a circle of stakeholders committed to creating conditions for a profitable and enduring peace thereby reducing the potential for crises and to preparing response mechanisms for coping successfully when crises do occur Summary
