Armoured Warfare:

Armoured Warfare Alaric Searle, 2017-02-09 This book charts the history of armoured warfare from the first use of the tank in 1916 right through to the 21st century adopting military political and global perspectives Alaric Searle explores the origins of the tank the part it played in the First World War and its contribution to the outcome of the war He considers its role as a tool of propaganda the military controversies of the interwar period and the employment of armoured forces in all the major theatres in the Second World War Since the First World War major and medium sized powers have invested heavily in armoured forces Searle looks at the conduct of mechanised warfare in Korea Indo China and Vietnam and during conflicts such as the Arab Israeli Wars and the Gulf Wars **Armoured Warfare** adopts a global perspective providing the most comprehensive survey of the history of the subject currently available With a detailed bibliography of both primary and secondary sources it is an ideal companion for those studying armoured warfare modern military history and war studies

Armoured Warfare in the Vietnam War Michael Green, 2014-10-30 This pictorial history of the Indochina and Vietnam Wars captures the range of armored warfare used in the region through rare wartime photographs The two conflicts that engulfed Indochina and Vietnam in the decades after World War II are generally thought of as infantry wars But in fact they both involved a significant amount of armored warfare In this fully illustrated volume military expert and Vietnam veteran Michael Green describes the many kinds of armored vehicles deployed and their contributions in combat The ill fated French Expeditionary Force of the Indochina War was largely equipped with World War II era American tanks including M3 and M5 Stuart M4 Sherman and M24 light tanks as well as armored cars and half tracks Most of these eventually went to the Army of the Republic of Vietnam but were outdated and ineffective due to lack of logistics and training The US Army and Marine Corps build up in the 1960s saw vast quantities of M48 Pattons M113 APCs and many specialist variants and improvised armored vehicles arrive in the theatre The Australians also brought their British Centurion tanks But it was the Russians Chinese and North Vietnamese who won the day and their T 38 85 tanks ZSU anti aircraft platforms **Armored warfare, an annotated edition of Lectures on F. S. R. III** John Frederick Charles Fuller, 1943 *Our Armoured Forces* Sir Giffard Le Quesne Martel, 1945 A history of the rise and development of armoured forces during the Second World War

Armoured Warfare Tom Clancy, 1995-10 This is the second volume in the Tom Clancy Military Library taking a look inside an armoured cavalry regiment the technology the strategies and the people Clancy gives descriptions of tanks helicopters and artillery and describes the technology behind the US army He captures military life from the drama of combat to the daily routine and reveals the roles and missions that have in recent years distinguished the fighting forces

Quest for Decisive Victory Robert Michael Citino, 2002 Since the earliest days of warfare military operations have followed a predictable formula after a decisive battle an army must pursue the enemy and destroy its organization in order to achieve a victorious campaign But by the mid 19th century the emergence of massive armies and advanced weaponry and the

concomitant decline in the effectiveness of cavalry had diminished the practicality of pursuit producing campaigns that bogged down short of decisive victory Great battles had become curiously indecisive decisive campaigns virtually impossible

Armoured Warfare in the Italian Campaign, 1943-1945 Anthony Tucker-Jones, 2013-09-19 This WWII pictorial history illustrates the wide array of armored vehicles deployed by Allied and Axis powers in Italy The Second World War campaigns in North Africa on the Eastern Front and in northwest Europe were dominated by armored warfare but the battles in Italy were not The Italian peninsula's mountainous terrain was best suited to an infantry war Yet from the Allied landings in Sicily in 1943 to the German surrender after the crossing of the Po in 1945 tanks self propelled guns and armored cars were essential elements in the operations of both sides Anthony Tucker Jones's selection of rare wartime photographs shows armor in battle at Salerno Anzio and Monte Cassino during the struggle for the Gustav Line the advance on Rome and the liberation of northern Italy These dramatic images reveal the full array of Axis and Allied armored vehicles that was deployed including German Panzers Panthers and Tigers and Allied Stuarts Chaffees Shermans and Churchills They also vividly illustrate the Italian landscapes over which the campaign was fought and the grueling conditions endured by the men who fought in it

Armoured Warfare in Northwest Europe, 1944-1945 Anthony Tucker-Jones, 2013-07-19 This latest volume in Anthony Tucker Jones's series of photographic histories of armored warfare records in graphic detail the role played by tanks infantry fighting vehicles and self propelled artillery during the decisive campaign in northwest Europe in 1944-5 In a sequence of over 200 archive photographs he shows how American British Canadian and Polish armored divisions spearheaded the assault on the Third Reich and how the Wehrmacht mounted a desperate armored defense Tanks were required to operate in the dust of Normandy the mud and waters of the Scheldt and Rhine rivers and the snows of the Ardennes and the forests of Germany A succession of crucial armored engagements was fought during the D Day landings Operation Goodwood and the struggle for the Bourguibus ridge the Falaise pocket the Seine crossing Arnhem the German attack in the Ardennes the Rhine crossing in the Reichswald and during the rearguard actions and the last ditch tank battles fought by the panzers in the Ruhr before the German surrender Anthony Tucker Jones's photographic survey of the ultimate tank battles of the Second World War illustrates the range of armored fighting vehicles that were developed during the conflict and it features the specialized vehicles deployed in Europe for the first time such as the Buffalo DUKW Weasel and Terrapin

Combined Arms Warfare in the Twentieth Century Jonathan Mallory House, 2001 For centuries the world has witnessed the development and use of increasingly complex and powerful military systems and technologies In the process the art of war has truly become the art of combined arms warfare in which infantry artillery air support intelligence and other key elements are all coordinated for maximum effect Nowhere has this trend been more visible than in the history of twentieth century warfare Originally published as an essential in house study for U S Army officers during the 1980s this much revised and expanded edition remains the most complete study available on the subject Rewritten with a much wider

readership in mind it both retains its enormous practical utility for military professionals and provides a valuable and appealing introduction for scholars and general readers Jonathan House author of the original work brings the story of combined arms up to the present covering among other things Desert Storm the war in Chechnya and the rise of smart weapons and related technologies He traces the evolution of tactics weapons and organization in five major militaries American British German Russian and French over 100 years of warfare Revealing both continuities and contrasts within and between these fighting forces he also provides illuminating glimpses of Israeli and Japanese contributions to combined arms doctrine Expanding his insightful analysis of the world wars and the wars in Korea and Vietnam House also offers much new material focused on the post Vietnam period Throughout he analyzes such issues as command and control problems of highly centralized organizations the development of special operations forces advances in weapons technology including ballistic and anti ballistic missile systems the trade offs involved in using heavy versus light armed forces and the enduring obstacles to effective cooperation between air and land forces His strong critique of the air superiority propaganda that came out of the Gulf War is sure to spark some heated debates Rigorously comparative House s study addresses significant questions about how nations prepare for war learn or don t learn its harsh lessons and adapt to changing times and technologies Unique in the annals of the literature on warfare it will be the standard work on this subject for a long time to come

Armoured Warfare on the Eastern Front Anthony Tucker-Jones,2011-06-13 A pictorial history and analysis of the tank warfare between Red Soviet and Nazi forces along the Eastern Front during World War II On the Eastern Front during the Second World War massive Soviet and German tank armies clashed in a series of battles that were unmatched in their scale and ferocity Several of them have attained almost legendary status But epic encounters such as these were only part of a broader story as Anthony Tucker Jones demonstrates in this selection of graphic photographs While the images give a fascinating inside view of combat they also reveal the daily routines of tank warfare 65 years ago Training maintenance transportation and supply are shown as are the daily lives of the tank crews and the often appalling conditions in which they worked and fought The photographs also record in vivid detail the destructive reality of armored warfare from the initial triumphant advance of the German panzers deep into the Soviet Union to the massive Red Army counter offensives which drove the German armies back to Berlin Praise for Armoured Warfare on the Eastern Front Each chapter includes a useful introduction and the pictures each come with an accurate and informative caption describing the item in the picture and placing it in context comparing it to its opponents at the time or looking at production numbers This is a high quality piece of work and a useful photographic guide to the armoured vehicles of the Eastern Front History of War *Armoured Warfare in the First World War 1916-18* Anthony Tucker-Jones,2016-11-30 A hundred years ago on 15 September 1916 on the Western Front during the Battle of the Somme the tank made its debut on the battlefield The first tanks were crude unreliable vulnerable weapons but they changed the character of land warfare forever and Anthony Tucker Jones s photographic history

of these pioneering armored vehicles is the ideal introduction to them In a selection of over 150 archive photographs he offers a fascinating insight into the difficult early days of this innovative new weapon describing its technical history and its performance in combat While the Battle of Cambrai in 1917 is often held up as the first large scale tank battle tanks had already served at Flers Courcette on the Somme during the Nivelle offensive and the battles of Messines and Passchendaele His book shows that the development of the tank was fraught with technical obstacles and battlefield setbacks It was invented by the British and the French at almost the same time to help break the deadlock of trench warfare and the British deployed it first in 1916 Belatedly the Germans followed the British and French example The initial designs were continuously refined during two years of intense warfare Finding the right balance between power and weight getting the armament right and working out the best tactics for tanks on the battlefield was a tricky often deadly business [Armoured Warfare in the Far East, 1937-1945](#) Anthony Tucker-Jones,2015-11-30 Anthony Tucker Jones s photographic history is a fascinating visual introduction to the armoured battles of the Second World War in the Far East and Asia Pacific regions from 1937 to 1945 In contrast to the experience of the armies that fought in Europe and North Africa in the Far East tanks remained an infantry support weapon and their role is often neglected in histories of the conflict Japanese armour confronted tanks deployed by the Chinese Russians British and Americans Early in the war against Chinese forces which lacked armour the Japanese had some success but their light and medium tanks were no match for their Allied counterparts Later Japanese designs were better armed but they were built in such small numbers that they could do little to stem the Allied advance The role of armoured vehicles in each theatre of the war in the Far East is shown in a selection of over 150 rare wartime photographs that record armour in action in China Manchuria Mongolia Malaya Burma and during the battles fought for the Pacific islands *Armoured Warfare in the Korean War* Anthony Tucker-Jones,2013-01-19 This fully illustrated history explores the unique role of armored vehicles in the Korean War with more than 180 wartime photographs After World War II military analysts thought that the only place significant armored forces were ever likely to confront each other again was in central Europe where the NATO alliance would fend off the Soviet Red Army But then during the Korean War of 1950 53 large numbers of armored fighting vehicles were deployed by both sides This neglected aspect of the conflict is the subject of Anthony Tucker Jones s photographic history Korea with its rugged mountains narrow passes steep valleys and waterlogged fields was not ideal tank country so the armor mainly supported the infantry and rarely engaged in battles of maneuver Yet the wide variety of armor supporting UN and North Korean forces played a vital if unorthodox role in the swiftly moving campaigns More than 180 contemporary photographs have been selected to show Soviet built T 34 85s and Su 76s American M4 Shermans M26 Pershings and M46 Pattons as well as British Cromwells and Centurions in one of the defining conflicts of the Cold War **Armoured Fighting Vehicles of the World: British and Commonwealth AFVs, 1940-46** Duncan Crow,1971 *Armoured Warfare in the Korean War* Anthony Tucker-Jones,2012 After the Second World War military

analysts thought that the only place significant armored forces were ever likely to confront each other again was in central Europe where the Nato alliance would fend off the Soviet Red Army Then during the Korean War of 1950-53 both sides deployed large numbers of armored fighting vehicles and this neglected aspect of the conflict is the subject of Anthony Tucker Jones's photographic history Korea with its rugged mountains narrow passes steep valleys and waterlogged fields was not ideal tank country so the armor mainly supported the infantry and rarely engaged in battles of maneuver Yet the wide variety of armor supporting UN and North Korean forces played a vital if unorthodox role in the swiftly moving campaigns For this fascinating book over 180 contemporary photographs have been selected to show Soviet built T 34 85s and Su 76s American M4 Shermans M26 Pershings and M46 Pattons and British Cromwells and Centurions in action in one of the defining conflicts of the Cold War Democracy and War Sir Guilford Lindsey Molesworth,1918 **Armoured Warfare and Hitler's Allies, 1941-1945** Anthony Tucker-Jones,2013-07-19 This WWII pictorial history sheds light on the armored fighting vehicles built and deployed by Italy Hungary and other Axis powers on the Eastern Front In discussions of Second World War military vehicles German American and British tanks are given the most focus Meanwhile the tanks self propelled guns and armored cars built and deployed by Hitler's Axis allies have been almost forgotten Both the rarity of these fighting vehicles and the vital roles they played in battle make them a fascinating subject of photographic history This selection of previously unpublished wartime photographs provides a visual record of the armored forces thrown into action by Hitler's allies on the Eastern Front from 1941 to 1945 Illustrated here are the panzers deployed by Bulgaria Finland Slovakia Hungary Italy and Romania on the Eastern Front and in the Balkans Hungary's home made armor included the Toldi and Turán tanks and Zrinyi self propelled guns The Italians produced CV 33 tankettes Semovente self propelled guns Autoblinda and Lancia armored cars and a series of tanks Romanian and Czech tanks and assault guns were also deployed *Brassey's Naval Annual* Earl Thomas Allnutt Brassey,1950 *Mechanical Traction in War for Road Transport* Otfried Layritz,1900 *The Aeroplane* ,1918
